Lemon Grove Assured New Rating by Fire Underwriters

Survey to be Made Here in November

The Underwriters are going to make a survey of the Lemon Grove Fire Protection District in November.

Chairman J. Morris Mulkey of the Fire Commissioners has been informed by John H. Colton, chief engineer of the Southern California Division that Lemon Grove is on the Underwriters' list for this survey, which will take place just as soon as other applicants ahead of us have been taken care of.

Mr. Colton stated in a letter to Commissioner Mulkey that the men who will make the survey will be here some time in November.

Lemon Grove now has a rating of 10 in the scale used by the Underwriters in determining the rates set for fire insurance. Ten is the highest. Six is considered par excellent and most communities are rated seven or eight. Chairman Mulkey hopes for a rating of seven, and feels confident that with our equipment we will rate at least eight.

The Lemon Grove Fire District is one of the newest in Southern California, and this being our first survey, we cannot expect too much from the Underwriters. As the efficiency of the department improves, the Commissioners can ask for resurveys from time to time, until eventually Lemon Grove will be rated with the best of them.

The local fire department is equipped with the best in the way of fire trucks, ample for any future growth the community might make, and it is a matter of bringing the personnel up to the standard set by the Underwriters.

One of our greatest drawbacks at present is the lack of adequate water mains and a sufficient number of hydrants strategically placed to the best advantage.

It is hoped that lack of proper mains will be overcome as time goes on, but the Irrigation District has its problems in keeping up with the growth of the territory which it serves.

As the fire district and the irrigation district are publicly owned properties, it is up to the people themselves just how much fire fighting efficiency by the fire department and supplimentary service the water district shall render.

Lindleys Here Five Years This Week

Lindley's Pharmacy is observing its fifth anniversary this week.

Robert Lindley opened his drug store in Lemon Grove September 26, 1947, and he is the town's oldest retail merchant in point of continuous service.

To properly celebrate the event Mr. and Mrs. Lindley are offering special inducements to the public to visit their store during anniversary week.

The Review joins their many friends in wishing them a long and prosperous business career in Lemon Grove.

See announcement on page 4.

FOOD SALE

Forward Club Juniors will sell baked food at the Plaza south of Broadway between Main and Imperial, on Saturday beginning at 9:30 a. m. Mrs. Philip Titmas, chairman, will be assisted by Mmes. L. A. Cellwood, M. D. Gardner, H. P. Guy and L. P. Scagliotti.

DATES CLAIMED

October 7—Turkey dinner, V. F. W. Hall, 2 to 7 p. m.
October 14—St. John of the Cross Annual Turkey Dinner.
November 4—Turkey dinner, V. F. W. Hall, 2 to 7 p. m.
November 16—Bazaar and Carnival, Forward Club and Forward Club Juniors.
December 2—Turkey dinner, V. F. W. Hall, 2 to 7 p. m.

Civic Program at Forward Club

Mrs. David Hentigan will present a forum on "Know Your Community," tomorrow (Friday) afternoon for the Forward Club at which time she will interview Ted Courtney, chairman of the Control Board of Community Center; Luther Hussey, local attorney and vice president of the Chamber of Commerce; and a representative from the Sheriff's office.

Club members can add much to the interest and value of the Forum by asking questions pertinent to the subjects under discussion.

Preceding the program, Mrs. H. Irving Vernier will conduct a business meeting promptly at 2 o'clock.

Hostesses for the tea will be Mmes. James K. Dougherty, J. E. Butler, Mary Conklin and Elizabeth McFeeley.

All ladies of the community who are interested in knowing about Lemon Grove are cordially invited.

Lewallen Takes Over Meats in Shepherd's Market

Mac Lewallen, who has leased the meat department in Shepherds' Market, has reopened the service with a stock of grade A meat.

Mr. Lewallen says he will handle only the best grades of meat and will specialize in meat cut to the customer's order. He formerly was with a large market on El Cajon boulevard.

Mr. and Mrs. Lewallen have purchased a home at 7842 Normal, just over the hill in La Mesa. They have two sons Don, 14, and Ronald, 12. They are members of the East San Diego Presbyterian Church but will be among the charter members of the new Presbyterian Church being established in Lemon Grove area.

Through an ad. on page 5, Mr. Lewallen invites the patronage of the public.

Benedicts Hurt in Texas Accident

Word has been received that Mr. and Mrs. Ray Benedict, 7564 Church, were badly injured when their car collided with a cattle truck at an intersection near Muleshoe, Texas, on Sunday of last week.

The Benedicts were on a trip to visit relatives in Texas, Kansas and Michigan. Their neighbor, Mrs. Edward Cavallin, 7551 Church, received a letter from Mrs. Benedict's sister that Mr. Benedict had not regained consciousness and was critically injured.

Mrs. Benedict, who had head, arm and shoulder injuries, regained consciousness and was able to give them addresses of relatives.

Local Girl Shown in Kiwanis Magazine

A picture of Marilyn Slauth, former student of the Lemon Grove Schools, appeared in the Cal-Nev-Ha, magazine of the California-Nevada District, Kiwanis International, in September.

Miss Slauth and Miss Syd Shrode appeared with Russ Stowell, general chairman of the District Kiwanis convention which takes place in San Diego October 7 to 10.

V. F. W. NEWS

Members of VFW Post 2028 will meet at 7 p. m. sharp Monday to go to Lakeside to visit the Post there.

A membership drive will start Monday. All veterans eligible are invited to join. Every member is to bring a new member at the October 9 meeting.

Turkey dinner, October 7, remember the date.

ON VACATION

Mr. and Mrs. F. Cressy of Cressy's Dry Goods, 7816 Broadway, left Monday evening for Boston and other points in New England. They expect to be away six weeks. T. F. Nutter is in charge of the store during their absence.

Presbyterian Church Planned for This Area

A Presbyterian Church, under the jurisdiction of the Los Angeles Presbytery, is in the process of organization in this area, with the focal point Imperial, Palm and Campo road.

Rev. and Mrs. John R. Chandler came here from Glendale to organize and head the new church. They are located at 3232 Par drive in the Brookside area.

A picnic is being planned for adults and their children who are interested in the new Presbyterian Church now being organized for the Lemon Grove-La Mesa-Spring Valley area. Everyone will meet at Eucalyptus Park, on Bancroft Dr. north of Campo road, Saturday, October 6, at 6 p. m. for a get acquainted supper. Each family is to bring their own food and service and coffee and punch will be served.

Mrs. A. W. Honeyfield, chairman of the Activities Committee, is planning the affair with the help of Mrs. R. A. Wright, Mrs. Oliver Turnbull, Mr. and Mrs. Nick Peters, Mr. and Mrs. Eddie Jensen, Mrs. Winfred Thomas and Mrs. Donald Mc Killop.

Robert Lang, well known magician and a member of the committee, will assist with the entertainment.

Plans are now under way for the first Sunday School and church service to be held October 14 at 10:30 a. m. in the Spring Valley Community Center, Memory Lane and Bancroft Dr.

Married at Historic Church

A marriage of much interest to this community was that of Mrs. Carol Winkle, owner of Carol Ann Shop, and Mr. Herbert H. Smith, of Los Angeles, on Sunday afternoon at Immaculate Conception Church, San Diego. The Rev. Fr. Julian Girardot officiated in the presence of about 40 guests.

The bride, given in marriage by her son, Harris W. Kimball, wore a dress of plum-colored crepe, with navy blue accessories. She carried a spray of vanda orchids on her prayer book.

Her attendant, Mrs. Jack Tally, of Temecula, wore a dinner dress of grey, with brown accessories. Her corsage was of pink carnations.

Ralph G. Richardson, Sr., attended the bridegroom.

A reception was held in the Regency Room of the U. S. Grant Hotel.

Mr. and Mrs. Smith drove to San Francisco on their honeymoon.

POWER FAILURE

Power throughout the San Diego metropolitan area was off from 1 to 3:45 this afternoon, due to trouble at the main plant of the San Diego Gas and Electric Co. Several items are omitted from this issue of the Review in order to make up for time lost during the shut down.

BOOK SECTION NEWS

Mrs. E. R. Scharer, 8029 Palm, received members of Book Section I of the Forward Club at her home Friday afternoon. Reports were made on 17 books read. Present were Mmes. Randolph Morse, chairman, Fred Wright, Hannah Abbott, William P. Donovan, Mary Conklin, Elizabeth Parsons and Marguerite Beddoe.

Book Section II of the Forward Club met Friday afternoon with the chairman, Mrs. A. R. Rettke, 3294 Vista. The Hungarian Rhapsody and Spin a Silver Dollar were discussed. All members of the Club are cordially invited to join the group.

WELCOME to New Readers

Rev. John R. Chandler.
Mrs Charles Foot.
Harold Tweed.
T. A. Rutherford.
F. O. Barber.

Invite Parents to Join PTA

All parents and other patrons of the school will be asked to join the P. T. A. at the Lemon Grove, Vista La Mesa or Monterey Heights Schools during the membership drive beginning next Monday on October 1. School children will be given envelopes for the dues of 50 cents a member. Parents are urged to return the envelopes with full membership dues and the information requested.

Anyone in the community who is interested in the schools of the United States is welcomed as a member of the Congress of Parents and Teachers. Those who do not receive envelopes may join the worthy organization by phoning Mrs. Channing P. Mason, membership chairman, at H 6-5273 for further information.

Many people do not know that part of this money goes to supply scholarships to train future teachers for America. The first requirement for good education is good teaching. Thus the future of our country may depend on the quality of our school teachers.

The Lemon Grove community is growing rapidly. Many new families have moved into this area during the past year. There is no better way to get acquainted with neighbors than by being an active member of the Parent Teacher Association.

Masons Invited to Join Local Club

The opportunity for Master Masons of the Lemon Grove area to meet monthly and to become better acquainted with one another is becoming increasingly popular, as is attested by the growth of the Lemon Grove Masonic Club.

All Master Masons are cordially invited to attend the meetings which are held the third Friday of each month at Leewood Trailer Court assembly hall at 8:00 p. m.

At the meeting of September 21, a tie clasp with Masonic emblem was presented by the club to Wm. Rife Jr., past president, as a token of esteem by the members for services rendered to the club.

W. A. De Hoffs are Wed 50 Years

Fifty years ago last Monday, William A. De Hoff and Miss Susanna Horten were united in holy wedlock in St. Stephen's Catholic Church in Cleveland, Ohio.

Last Sunday this same devoted couple pledged their vows anew at High Mass at 8 o'clock at St. John of the Cross with all of their family here to add to the happiness of the day.

William worked diligently at his trade of ornamental iron and wire worker. Susanna and her daughter Elnore came to California in 1933 and William and the rest of the family soon followed.

They located at 8006 Mt. Vernon where they have a lemon and orange ranch.

The entire family enjoyed a bountiful breakfast at the De Hoff home following church services. Covers were laid for their son, Norbert De Hoff, his wife and their two children, Norbert, Jr. and Susan of Los Angeles; another son, William E. De Hoff, his wife and three children, Mary, Sylvia and David, of La Mesa; their son-in-law and daughter, Mr. and Mrs. Gordon Boltz, Donald, Trudy and Mary, 8036 Mt. Vernon; their daughter, Mrs. Elenore Starkey, at home, and Mr. De Hoff's sisters, Miss Josephine De Hoff and Elizabeth Scharer, 8029 Palm.

In the afternoon, with the Right Rev. Msgr. F. A. Wekeman of San Diego Mission and the Rev. Fr. John McDonagh, local pastor, as additional guests, Mr. and Mrs. De Hoff presided at a nicely appointed dinner party at the Kissell House with all of the family present.

The Review joins the many friends of this happy couple in wishing them more anniversaries.

To Plan Yuletide

Mrs. E. A. McGuire, chairman for the Christmas committee of the Lemon Grove Chamber of Commerce, requests representatives from all local organizations to meet Monday at 7:30 in Homeland Jusice Court room. Anyone interested is welcome.

Carr's Opening Colorful Affair

Lemon Grove gave Carr's Hardware a royal welcome Friday evening. About 2000 people called and inspected the new store. The crowd was so dense most of the time that it was impossible to get a good view of the store.

Mr. and Mrs. Carr and helpers were delighted with the response, in fact, they were overwhelmed with the reception and especially the many floral arrangements and beautiful plants.

Mr. Carr says it was impossible for him to meet each one present so he hopes everyone will come back to get acquainted.

This new building erected by Harry Griffen and associates is an outstanding addition to Lemon Grove's business section and the builders are to be congratulated upon their vision.

Lindley Tells of Drug Business

Robert Lindley told the Kiwanis Club Wednesday noon at Community Center what it means to be a druggist and dispense medicines to the public.

He defined dangerous drugs, that is, drugs that are not safe for self medication, but should only be used under the direction of a physician, and quoted the law upon the subject, as follows: "No person shall furnish any dangerous drug except upon the prescription of a physician, dentist, chiropodist or veterinarian."

Many people bring back the bottle in which the original prescription was sold, and want it refilled. In the case of the dangerous drugs pharmacists are not permitted to refill these prescriptions, much to the chagrin of the customer.

Mr. Lindley quoted section 29022 of the State Pharmacy Code, which says: "No person shall refill any prescription for any hypnotic drug, nor shall any prescription for any dangerous drug be refilled except upon the authorization of the prescriber."

Wednesday was Mr. Lindley's fifth anniversary in the drug business in Lemon Grove.

His talk on the filling of prescriptions and the handling of poisons was enlightening to the group.

Robert Porier gave a talk on Hi-Y Clubs, and Andy Benson, executive secretary of Grossmont Hospital Association, outlined the steps taken to establish a hospital district.

CIRCLE MEETING

Dorothy Jackson Circle of First Baptist Church of San Diego will meet next Thursday at the home of Mrs. Frank Greenlee, 8425 Golden. Mrs. R. T. Gardner will talk on "Guatamela." Guests are welcome.

CLUB MEETINGS

Lemon Grove Chamber of Commerce, first Tuesday evening Homeland Justice Court.
Lemon Grove Kiwanis Club every Wednesday noon, Community Center.
Lemon Grove Lions Club every Thursday evening, VFW Hall.
Mt. Helix High-Twelve Clul International, every Thursday noon, Comanche Bowl.
Business Women's League, first and third Thursday noon Place announced.
Lemon Grove Masonic Club third Friday evening, Leewood Trailer Court.
Lemon Grove Post 2082, V.F.W., second and fourth Tuesdays, V.F.W. Hall, Imperial at Lincoln.
San Miguel Chapter, OES, second and fourth Wednesday evenings, Friendship Hall.

Kiwanis Presents Gavel to Spring Valley Men's Club

The newly organized Spring Valley Business Men's Club is to be called to order hereafter with a gavel presented by the Lemon Grove Kiwanis Club as a token of good will and well wishing at the October meeting of the Spring Valley group next Wednesday evening.

Kenneth Hall, vice-president of the Kiwanis Club, will make the presentation.

The Spring Valley Business Men's Club was recently organized with 27 members, and meets at the Goodland Acres club house.

K. E. Curtis is president.

Congregational Women Meet Here

Mrs. Lyman Crossman, of Los Angeles, president of Southern California Association of Congregational Church Women and Miss Helen F. Smith of New York, national chairman of Friendly Service, will be the speakers at the Fall luncheon meeting of the San Diego Association of Congregational Church Women in Friendship Hall next Wednesday.

Ladies of First Congregational Church will be hostesses and the program will start at 10:30 a. m.

All church women are invited and reservations for luncheon must be made with Mrs. Ralph Lee, Main 4-6782.

ON THE JOB NOW

Grover McMahon, 3039 Cypress St. who came to Lemon Grove from Newton, Iowa, five months ago, is now ready to resume his position with the Northern Insurance Company's San Diego office. Shortly after moving into his new home he suffered a back injury and was confined to the Naval Hospital for several months. He returned to work last week.

SCOUTERS COURSE

A Girl Scout Basic Leadership course wil be given on October, 4, 11, 16, 18, 23 and 25 in Vista La Mesa Christian Church. Mrs. L. J. Nash of La Mesa will instruct Brownie leaders and Mrs. John Kish, the Intermediates. All interested in Scouting are welcome. If needed there will be a baby sitter.

MUSIC CLUB MEETS

The Music Parents Club will meet Monday at 7:30 in Community Center.

Millers Observe Golden Wedding

Mr. and Mrs. G. Miller, 7953 Mt. Vernon, will observe their Golden Wedding anniversary next Sunday morning with High Mass at St. John of the Cross at 9 o'clock.

Breakfast will be served to their six children and their families at the home and at 2 p. m. Mr. and Mrs. Miller will preside at a beautifully appointed dinner party in the Regency Room of the U. S. Grant Hotel, San Diego.

Charles G. Miller and Miss Catherine Borlinghausem were married in St. Stephen's Catholic Church in Cleveland, Ohio, on October 2, 1901.

Mr. Miller was a manager in a shoe factory but in 1911 he heard the call of the west and came to California locating on a lemon ranch on Mt. Vernon. Here, most of the children were born and when the boys were a little older, the family cow was increased by one, then two, then many more and today two of the sons have a fine dairy.

Composing the family are Mr. and Mrs. Charles N. Miller and daughter Miss Sue, of San Diego; Hubert J., at home; Mr. and Mrs. Edward F. Miller and son, Robert, 7971 Mt. Vernon; Mr. and Mrs. William Miller, Chris, Ray and Joyce Catherine, 2336 Loma; Major Ralph B., U. S. Air Force, Merced Air Field, recently returned from Korea; and Mr. and Mrs. Mel (Florence) Eastwood of North Hollywood.

The Review wishes to be numbered among the host of friends wishing Mr. and Mrs. Miller many more anniversaries.

Work Moving Forward on New Schools

Despite the critical shortages of essential building materials, at least two of the schools now under construction in the Lemon Grove School District will not be affected by the materials shortage. Superintendent Byron L. Netzley said this week that he had received an OK on the copper and steel allocations for the Lemon Grove Elementary School on Golden Avenue and School Lane, and this was further verified by a telephone call from Senator Nixon, U. S. Senator from California. Thus this new unit, consisting of six classrooms and a principal's office, is expected to be completed and ready for occupancy by the first of November.

Since the amount of steel and copper being used in the Vista La Mesa School addition did not require government approval, those six classrooms and multi-purpose room should be completed by approximately February 1. The multi-purpose rooms being constructed in the district will be used as auditoriums, cafeterias, indoor gyms when necessary, audio-visual rooms, and many other purposes.

April 1 is the estimated date for the new San Miguel School, which has seven classrooms, a principal's office, and a multi-purpose room. Full approval on materials allocations has not yet been received here, but the copper shortage is the main problem in this construction.

At present construction rates, the Monterey Heights School addition, six classrooms and a multi-purpose room, should be completed by early summer of 1952. Building is now in progress with the steel on hand, but a larger supply will be needed later.

The local Chamber of Commerce has written to Washington, urging the approval of steel and copper applications from this crowded district.

At a meeting of school business officials of San Diego and Imperial last Thursday evening in San Diego, it was pointed

Continued on Page 4

IT'S A GIRL

A baby daughter, who has been named Joyce Catherine, was born to Mr. and Mrs. Wm. P. Miller 2336 Loma, on September 17 at Mercy Hospital. Baby Joyce was welcomed home the last of the week by two brothers, Chris, aged 3, and Ray 1½.

SCIENCE LECTURE

Page 3 of today's Review is given over to a lecture delivered at the La Mesa First Church of Christ, Scientist, Sunday evening, Ralph Castle, C. S., of San Francisco was the lecturer.

DIRECTORS MEETING

The October meeting of the Directors of the Lemon Grove Chamber of Commerce will take place next Tuesday evening. The public is always welcome at these meetings.

DAYLIGHT SAVING ENDS

Found—One hour, lost last April. Will be returned to the people next Sunday morning at 2 o'clock.

United Taxpayers Association of San Diego County will meet tomorrow (Friday) in Judge Molina's Court Room, at 8 p. m. Call H 6-3164 for transportation.

The Garden Section of the Forward Club meets next Wednesday at 2 p. m., at the home of Mrs. Ted Haaf, 7825 Palm avenue. All members of the Forward Club are invited.

Fire Calls of the Week

In case of fire call H 6-4310.

Another week without fires, reports Fire Chief Carmody. One false alarm called out a truck.

THE WASHINGTON Merry-Go-Round

BY DREW PEARSON

(Ed. Note—While Drew Pearson is on a brief vacation, the Washington Merry-Go-Round is being written by several distinguished guest columnists; today's being by Corporal Charles Francisco, with the U.S. Army's Seventh Division in Korea. Corporal Francisco, a native of Urbana, Illinois, was inducted in September 1950, and sent to Korea as a machine gunner shortly thereafter.)

Loneliness and Death

WHAT is it like in Korea? What is it like to the men who are here? I think of three things around me—mountains, loneliness and death. I think of retation and home and the future. And I know that those things are in the minds and bones of most infantrymen in Korea.

As a soldier lies in his foxhole and tries to peer through the mist that covers the top of a mountain he thinks of many things. This is the war in Korea as I see it.

It seems to me that civilian writers covering the war have not made enough mention of the hills. At any rate, the hills have a major bearing on the job of the individual soldier and the entire tactical situation.

A Strange Enemy

Mountains and weather . . . enemies which have proved as effective against the U.N. forces as the Reds themselves. Last winter it was cold and snow. You've heard about that. So far this summer the temperature has averaged in the humid eighties. When it isn't hot, it's raining . . . steady downpours for two and three days straight.

It's a strange war here in Korea. It's a strange soldier we fight. Reports from intelligence speak of such things as "the Chinese may be waiting for a full moon" or "expect an attack if we get three straight days of rain." The Chinese are superstitious. They frighten easily and they fight fanatically.

Every soldier dreads nightfall. The Reds love to infiltrate at night and launch wild whistle-blowing banzai attacks. The enemy uses his artillery most at night. Unlike most wars there are no clear cut front lines in Korea. The enemy can be any place at any time.

Casualties Are Friends

I remember the first man I saw killed. We had been joking about how easy we had it. Then the artillery came in. He was dead. The same shell was close enough to have gotten me but it didn't. Incidents like these encourage the foxhole faith you read about in civilian life.

When you're a part of a war the casualty list isn't just a row of numbers. Every figure is a man who wanted to live and do something with his life just as you do. The next digit could be you.

Then there's the matter of heroes. Before I entered combat I thought heroism was a rare and individual thing. Long ago that was true. But today any man who performs his duties well under fire is a hero for my money. A knight of old may have singlehandedly slain dragons but a modern soldier cannot do hand-to-hand battle with shrapnel.

At least one good thing comes of war . . . teamwork. I don't mean the military teamwork of infantry, artillery, air, etc. Even more significant is the comradeship of men in battle. In my own regiment (17th Infantry) racial or religious prejudice is unheard of. A man soon learns to appraise the guy beside him by his courage under fire. That's where men are made.

A Personal Fight

I sometimes wonder if war isn't more of a personal fight than it seems. A man seldom has time to consider world ideals. It usually narrows down to kill or be killed.

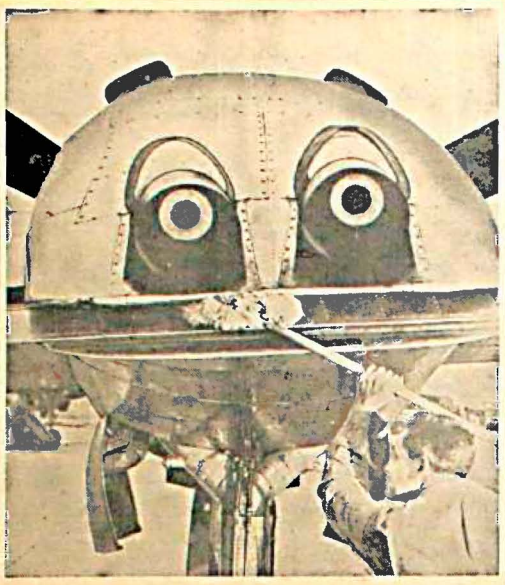
Korea today is not only a deadly place but also a lonely one. There are no cities, as we know them, in the battle zone. Only hills and wilderness. The infantry would thrill to see such simple things as telephone poles, paved streets, brick buildings and stores.

Many men now in the front lines were only recently removed from civilian life by the draft. They dream about getting back to the work they love.

The Men Wonder

Soldiers, as always, have their gripes. Rotation is wonderful, but sometimes it seems awfully slow in coming around. When they see stateside papers with Korean news mentioned briefly they wonder if the people back home care.

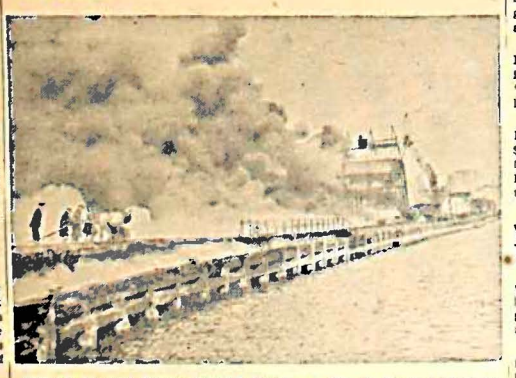
The men here know why they're fighting. You hear "Why not give them the place." But when you talk seriously with these same men, most of them will admit they were only letting off steam.



NOT AS BAD AS IT LOOKS . . . No, this frightening spectacle is not a creature from Mars. And it is not a monstrous beetle having its teeth massaged. Nor is it one of those strange creations met by Alice in Wonderland. It happens to be, in fact, the rear end of a convair engine. The engine is undergoing its periodic cleanup by an airline mechanic, Al Stern, to whom the only thing grisly about the whole deal is the oil and grime that must be removed. Scene is a Chicago airport.

OBJECTION OVERRULED . . . Andy Seminick, Philadelphia Phils' catcher, goes into a huddle with Umpire Pinelli over Seminick's catch of a pop ball in a recent Giants-Phils match in New York. Pinelli ruled that the ball hit the foul screen and was not an "out" although it was caught, Seminick disagreed, causing this minor rhubarb, which looks like a slice of a peace conference or an armistice talk.

FAMOUS DAUGHTERS AT FILM PREMIERE . . . Miss Sarah Churchill (left), daughter of the former British prime minister, Winston Churchill, and Miss Margaret Truman, daughter of the President of the United States, pose for the camera in the lobby of a New York theater where they went to see the first showing of the moving picture, "The Medium."



THREE ALARM FIRE SWEEPS PIER . . . This is the general scene of confusion and din as fire fighters from Edgewater, N.J., go about trying to extinguish a three-alarm blaze on a pier extending into the Hudson river. The pier is next to the giant Ford Motor Company's assembly plant in Edgewater. Scene of the fire is pier A. The pier is owned by the Susquehanna railroad. At the time this picture was made, officials had reported no casualties from the conflagration.

Cohonina Tribe History is Told By Discoveries

URBANA-CHAMPAIGN, Ill. — From evidence 850 to 1300 years old, Prof. John C. McGregor and archeologists from the University of Illinois have solved some of the mysteries about a longgone and forgotten Indian tribe of northwestern Arizona.

Two summers ago an expedition from Illinois explored 17 sites once occupied by the Cohonina Indians. A report published recently by the University of Illinois Press presents their findings and studies for many months after digging in the field.

Meanwhile Professor McGregor and his students from Illinois are again this summer in the area around Flagstaff and the Grand Canyon working with the Museum of Northern Arizona seeking answers to many remaining mysteries of the Cohoninas.

The 158-page report issued today tells more about these people than ever before has been known.

Summer Camps

Professor McGregor believes that all the Cohonina sites so far found are summer camps, most likely hunting camps, since even today the area offers good hunting. None of the houses had fires built inside them, evidence of occupation in summer only. Tree rings in wood and charcoal found date the sites at 638 to 1090 A.D.

Associated with the houses were remains of "shades," thatched roofs raised on posts to afford comfortable shaded but breeze-swept summer work areas. Numbers of post spots at each site show the shades had been rebuilt several times, while the houses also show signs of repeated occupation and of remodeling.

Practically all the pottery found was broken. Ninety-three per cent of the fragments were of the type which first led the Cohonina to be identified as a separate tribe. Although 7,200 pieces were recovered, this total is far below that to be expected from experience in similar excavations elsewhere.

This points to temporary occupancy, with everything valuable removed from a site each season. Another evidence is lack of many items which should be found at a regular home site, such things as stone axes, beads, ornaments, and the like.

That leaves the question of where did the Cohoninas spend their winters? This still is to be answered.

Another question is, why were there no animal bones in garbage remains around their camps? These are found in almost every habitation site from present to most ancient. Professor McGregor surmises the Cohoninas skinned their kills where they fell and cut the meat ready for drying to take back to the winter home.

Clothing from Leather

That these Indians made clothing of leather is revealed by the finding of a few finely-made bone sewing awls—the only bone remains of any kind. The print of cloth on the bottom of some pottery shows that cloth was commonplace enough for a soft new pot to be placed on it while being finished.

Stones used for grinding meal, and rows of stones set into stream beds to divert water to garden plots show that these Indians farmed. One kernel of their corn actually was found, as well as a pumpkin seed, two juniper seeds, and walnut shells.

Some pottery not of Cohonina type, pottery designs, and house plans show evidence of trade and relations with other tribes.

On the wall of a small canyon the archeologists found pictographs which may have been made by the Cohoninas.

Republicans Say Truman Should Give up Yacht

WASHINGTON, D. C.—A few Republican congressmen think the President should set the example of moderate living for the people, and so hold that Truman should give up his presidential yacht and airplane.

Representative Auchinloss (R., N.J.) told the House that the President could set a good example by "denying himself some of these luxuries."

Another Republican, Schrivner, Kansas, pointed out that about $500,000 of the $56,000,000,000 defense appropriation bill now in the House is earmarked for upkeep of the presidential yacht.

You Take Potatoes, then Tomatoes—Off the Same Vine

MOUNDS, Ill. — Double action was uncovered here recently when it was found that a single row of plants had produced both potatoes and tomatoes.

Rev. I. H. Frazier seeded only potatoes in his garden plot, but the plants grew tomatoes on the vines and potatoes on the roots.

Local naturalists pointed out that tomatoes and potatoes are members of the same (nightshade) family and occasionally both grow from the same seed or root.

HOUSEHOLD HINTS

Tomato Use

When tomatoes have been purchased, sort them and use the ripest ones first—then store the rest in the refrigerator until you are ready for them.

• • •

Chicken Roasting Time

Chickens weighing 3 to 4 pounds dressed weight usually require a roasting time of 1½ to 2 hours in a 350-degree oven.

• • •

Removing Spots

Water used in cleaning spots on clothes should have a temperature of between 120 and 125 degrees Fahrenheit.

• • •

Thrifty Breakfast

A thrifty, yet nutritious breakfast, would include fruit or juice, cereal, milk, bread and butter.

• • •

Lemon Flavoring

Lemon juice can be used as a flavoring for fish, seafood, tomato juice, sweet fruit juices, cooked greens, and other vegetables.

• • •

Leftovers

Save left-over cooked meats, poultry, and fish for use in casserole dishes, hash, or in stuffings for vegetables.

• • •

Ironing Board

When traveling, you can improvise an ironing board by inverting a dresser drawer and covering it with a bath towel.

• • •

Family Picnic

Summertime is a good time for the family to get together at an outdoor grill or barbecue pit. Also occasional buffet and picnic basket meals give everyone a chance to relax occasionally from indoor mealtime.

• • •

Sharpening Scissors

You can sharpen your scissors by cutting through fine sandpaper several times.

• • •

Slicing Cake

To slice a freshly baked cake without crumbling it, dip a sharp knife in hot water, dry carefully, and cut.

JUST LAUGHS

Top to Bottom

The Bright Young Thing entered the men's shop and approached the counter.

"I want a present for an old gentleman for Christmas," she said.

"Yes, ma'am," replied the clerk. "Something nice in ties?"

"No; he has a beard," the girl explained.

"H'm," the clerk murmured thoughtfully. "Perhaps a fancy vest might be suitable?"

"No; it's a long beard," came back the answer.

The clerk sighed wearily.

"Well, how about carpet slippers?"

—•—

Overdue

Collector—"Say, I want to collect some back payments on your antique furniture."

Head of the House—"You're crazy. I never bought any antique furniture on the instalment plan."

"Well, maybe it wasn't antique when you bought it."

—•—

Which One?

The witness was undergoing a cross-examination. The lawyer had badgered him unmercifully, and finally said with a mixture of solemnity and fierceness, "Can you look me in the eye and repeat that?"

The witness looked at him a moment and asked quietly, "Which eye?"

Softly Tailored Frock Designed to Flatter

Two Piece Frock

A SOFTLY tailored two piece frock designed to flatter the slightly larger figure. So pretty and smart with its twin pockets, yoked front and back, gored skirt.

Not So Sure

A man in North Carolina, accused of horse-stealing, was saved from conviction by the powerful plea of his lawyer. After his acquittal by the jury, the lawyer took him aside, and asked smilingly, "Honor bright, now, Bill, you did steal that horse, didn't you?"

"Now, look a-here, Judge," was the reply, "I allers did think I stole that horse. But since I hearn yore speech to the jury, I'll be doggoned if I ain't got my doubts about it."

Colombo Plan Aids Southeast Asians

Tomorrow's standard of living may be better for one-quarter of mankind because of an economic bootstrap called the Colombo Plan.

This six-year blueprint for development of South and Southeast Asia, sponsored by the British Commonwealth, went into action to lift the well-being of 570,000,000 people. Its $5,230,400,000 budget covers objectives from a dam the size of Hoover Dam to be built in northern India, to free public schools for the children of Singapore.

India, Pakistan, Ceylon, the Federation of Malaya, Singapore, North Borneo, Sarawak and Brunei will spend this money between now and 1957 under the plan, which was drawn up by an international consultative committee meeting in Colombo, Ceylon, in Sydney, Australia, and in London during 1950. Burma, Thailand, Indonesia and Indochina have been invited to take part in the program.

NO MORE HARSH LAXATIVES!

"My wife had tried many kinds of harsh laxatives before she started to eat ALL-BRAN regularly. The immediate results amazed us. She hasn't been constipated since." Fred A. Moody, 623 Park Ave., Greensboro, N. C. *One of many unsolicited letters from* ALL-BRAN *users.* If you suffer from constipation due to lack of dietary bulk, try this: eat an ounce (about ½ cup) of crispy Kellogg's ALL-BRAN daily, drink plenty of water! If not satisfied after 10 days, return empty box to Kellogg's, Battle Creek, Mich. Get DOUBLE YOUR MONEY BACK!

WNU—12 39—51

"Monthly Pains" stopped or amazingly relieved

in 3 out of 4 cases in doctors' tests!

• Chances are you're putting up—*unnecessarily*—with the functionally caused pains, cramps and weak, "no good" feelings of menstruation!

For, in actual tests by doctors, Lydia Pinkham's Compound brought *complete or striking* relief from such distress in 3 out of 4 of the cases!

Lydia Pinkham's *is modern in its action!*

So get Lydia E. Pinkham's Vegetable Compound—or new, improved Tablets with added iron. See if—taken through the month—it doesn't give relief from those backaches, jitters—help you feel better before and during your period!

Or—if you suffer from functional "hot flashes" of "change of life," find out how wonderful Pinkham's is *for that, too!*

It has a quieting effect on uterine contractions that often cause menstrual pain!

Non-Smear Lipstick

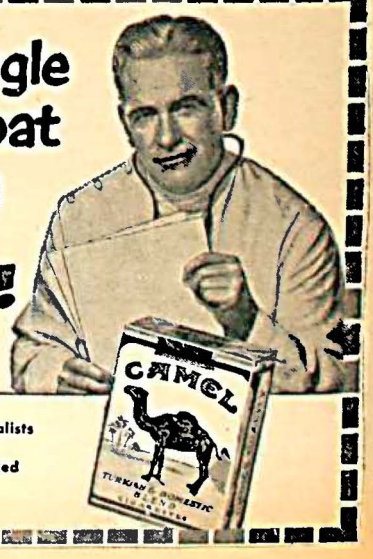
Won't Eat Off - Bite Off - Kiss Off!

HERE IT IS! The entirely new-kind-of-lipstick that won't come off on cups, glasses, cigarettes, teeth—or the object of your affection! **HAZEL BISHOP** is the only lipstick that stays on and on until you take it off! There's nothing like it!

TODAY GET HAZEL BISHOP'S revolutionary NON-SMEAR, LASTING LIPSTICK in your most flattering shade. More economical, too—you use it only once or twice a day! Only $1.10 MONEY BACK GUARANTEE.

Hazel Bishop Lasting Lipstick

Not one single case of throat irritation due to smoking CAMELS!



—that's what noted throat specialists reported in a coast-to-coast test of hundreds of people who smoked only Camels for 30 days!

Mail Christmas Parcels Overseas by November 15

Christmas parcels for members of the Armed Forces overseas should be mailed between October 15 and November 15, the Department of Defense has announced.

Parcels for delivery in Japan, Korea and the Pacific Islands should be mailed not later than November 1. Parcels for military personnel serving in more remote areas should be mailed prior to October 15.

Boxes destined for overseas must be strong wood, metal, or fiberboard. Each box should be securely tied with strong cord, and loose flaps should be sealed with gummed tape. Unless completely packed and tightly filled, boxes are likely to be crushed.

In addition to the usual articles normally prohibited in the mails, matches of all kinds and lighter fluids are banned from all parcels.

Cigarettes and other tobacco products also are not mailable to the following military post offices:

APO 1, 10, 11, 13, 19, 21, 30, 42, 46, 55, 57, 58, 61, 62, 65, 66, 69, 79, 82, 114, 124 125, 139, 147, 154, 162, 168, 169.

Also 171, 172, 174, 175, 178, 179, 207, 208, 209, 225, 227, 305, 349, 403, 407, 541, 633, 696, 742, 743, 751, 757, 777, 794, 800, 807, 843, 872 and Navy No. 913.

Christmas cards carrying 1st class postage should be mailed prior to November 15 and those with air mail postage prior to December 1.

New Stretch to Improve Hiway 101

Plans involving relocation of a mile and a half of the Pacific Highway north and south of its intersection with Balboa Avenue in San Diego were made known today by the California Highway Commission. The Commission requested George T. McCoy, State Highway Engineer, to consult with local authorities to determine if they desire a hearing by the Commission before final action is taken on the project.

The proposed relocation, which will parallel the Santa Fe Railroad, will make it possible to develop this portion of the route as a full freeway, allowing the present highway to remain for local and commercial development. Future development along either Balboa or Grand Avenue will be equally well served by the proposed relocation.

Surveys indicate that nothing less than a six-lane divided highway could adequately handle future traffic demands. Total cost, including right of way, is estimated to be $1,500,000.

Engineers of the Division of Highways recommended that a route be adopted and necessary right of way be purchased as soon as possible. Otherwise, they warn, rapid growth of the area will skyrocket land values to a point where the cost of acquiring right of way for future development of the new freeway will become prohibitive.

The population of San Diego County, which is mainly concentrated in the City of San Diego metropolitan area, totaled 536,000 according to the 1950 census, an increase of 85.2% in the past ten years. Phenomenal growth of traffic in the area is overtaxing existing facilities. The present signal system at the intersection of Pacific Highway and Balboa Avenue, recently revised to provide three-phase operation, is proving inadequate under the increasing amount of left-turn traffic.

A total of 23,000 vehicles, 2,500 of them trucks, travel over this highway on an average day. If San Diego's phenomenal growth continues, the year 1970 will probably see 40,000 vehicles a day rolling along this same stretch of highway.

The Pacific Highway, which is a part of U. S. Highway 101, carries a high volumn of defense traffic plus tourist traffic from the north to the San Diego and Mexican border area. On weekends and holidays the route traffic capacity is taxed by motorists from Los Angeles and northern cities bound for San Diego area defense establishments and for Mexico.

Work on Mission Bay Park is progressing rapidly. When completed, it will bring even further roadside developments along the bay front, west of Pacific Highway.

The total consumption of nickel for coinage purposes in 1949 throughout the world exceeded six million pounds. Because of increased defense demands for nickel it is possible that use of this metal for coinage will be suspended.

A Lecture on Christian Science

Entitled

Christian Science: Healing by the Power of God

by

Ralph Castle, C. S. of San Francisco, California

Member of the Board of Lecturership of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts

Mrs. Laura McCray, Second Reader, made the following introduction:

Friends:

First Church of Christ, Scientist, La Mesa, California, welcomes you to this lecture.

The Bible is full of accounts of the healing of sin, sickness and death by the power of God. In modern times this power is again being recognized and utilized as a result of the discovery of Christian Science by a deeply spiritual woman, Mary Baker Eddy.

Our lecturer, this evening, will speak to you on the subject, "Christian Science: Healing by the power of God." He is a member of the Board of lectureship of the Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts.

It is my privilege and pleasure to present to you, Ralph Castle, of San Francisco, California. Mr. Castle.

The lecturer spoke substantially as follows:

"I also am a man set under authority" (Luke 7:8). This declaration, made by the Roman centurion when appealing to Jesus the Christ to heal his servant, implied definitely his recognition that the Master did not perform his mighty works through human will or any power of his own, but that he was acting under orders received from a higher source. Although unable to formulate a description of this higher power, the centurion was conscious—maybe only dimly—of the Christ, or the power of God, infinite Truth, as the authority under which Jesus worked and in whose name the Saviour healed the sick and raised the dead. Jesus discerned the spiritual quality which the centurion expressed; for, as you remember, he commented, "I have not found so great faith, no, not in Israel."

Through the centuries spiritually-minded men and women have glimpsed the Christ, or the divine Truth which Jesus manifested, to the extent that they were enabled to contribute to the spiritual growth of others. It remained for Mary Baker Eddy, the Discoverer, Founder, and Leader of Christian Science, actually to set forth in language understandable by all what she describes as the Science of Christianity or Christian Science; in other words, the spiritual rules applied by Jesus, which resulted in miracles and mighty works. Albeit, Mary Baker Eddy did not present these rules to the world until she had proved by demonstration that their correct application furnished clear evidence of physical healing and moral regeneration.

Mrs. Eddy's discovery of Christian Science was not the result of a sudden vision or of an instantaneous revelation. It was vision, to be sure—spiritual vision—developed and cultivated by her through the years, and her writings are unquestionably the outcome of divine revelation. We need to remember that she was spiritually prepared to receive this revelation by virtue of her own implicit faith in the power and love of God, a faith which she had possessed since early childhood and which was justified by an instantaneous physical healing when she was only twelve years of age.

We cannot question that this healing made a profound impression on the child, Mary Baker, for she felt her own individual concept of God and of God's love warranted her in declining to accept the religion of her father, who endeavored to urge upon her the teachings of the theologian, John Calvin. Be it said, Mary Baker was not intolerant in her attitude toward her father or his religious views. On the contrary, she expressed humility and respect. Yet she stood firmly on her own spiritual convictions, a quality which characterized her life and which enabled her, several years later, to prove again the power of God by another instantaneous physical healing.

Students of Christian Science are familiar with the details of this healing and of Mrs. Eddy's subsequent withdrawal from society that she might search the Scriptures and devote her time and energies to discovering what she termed "a positive rule." On page 109 of her textbook of Christian Science, "Science and Health with Key to the Scriptures," Mrs. Eddy writes, "The revelation of Truth in the understanding came to me gradually and apparently through divine power." On page 110 we read: "Jesus demonstrated the power of Christian Science to heal mortal minds and bodies. But this power was lost sight of, and must again be spiritually discerned, taught, and demonstrated according to Christ's command, with 'signs following.'"

Prayer of Realization

Surely this power, which was lost sight of, the power by which Jesus healed, is the power, or authority, of God. And this power, or authority, can only be spiritually discerned. It is a spiritually mental operation. Nothing material enters into its premises or conclusions. It is the prayer of realization in distinction from prayer which is merely a petition, and the signs following are seen in the healing of bodily ailments and the regeneration of the sinful. In a chapter entitled "Fruitage" in the Christian Science textbook, one hundred pages are devoted to recounting authenticated healings in Christian Science, healings which resulted from reading the Christian Science textbook. Materiality, or physicality, lacking spiritual comprehension, constantly is challenging the demonstration of this power with the question, "By what authority doest thou these things?" (Matt 21:23.)

It is significant that when he was challenged by the Pharisees, "By what authority doest thou these things?" Jesus declined to answer. On another occasion he stated quite definitely, "I can of mine own self do nothing" (John 5:30), and in John 14:10 Jesus is recorded as saying, "The words that I speak unto you I speak not of myself: but the Father that dwelleth in me, he doeth the works." Jesus knew that only those who grasped the spiritual import of his words could perceive that it was his realization of the presence of the Christ, or power of God, which enabled him to perform the miracles, so called, as recorded in the Gospels. Through spiritual discernment Jesus detected that the Pharisees, who questioned his authority, were so steeped in materiality, and were so fearful and resentful of the effect I is works were having on the people, that they could not, and would not, have understood him had he declared his authority as that of the one God. On the other hand, with Nicodemus he was willing to enter into quite a lengthy discussion. In other words, the Master dealt with each set of circumstances as he was divinely led. He adhered to no set custom and allowed no formula. He met every situation as its master, fully aware that he was God-equipped to speak and to act as the occasion demanded.

Spiritual Discernment Requisite

Mary Baker Eddy sometimes refers to Jesus in her writings as the Way-shower and the great Exemplar. As Jesus demonstrated spiritual discernment, so is the cultivation of this ability a part, and an important one, of the practice of Christian Science. It goes without saying that to discern the spiritual standpoint is the effect of a natural ability and practice to think spiritually. So, for the moment, let us agree that spiritual-mindedness is prerequisite. The power of Christian Science, which Jesus demonstrated, included the faculty to detect erroneous thinking, or sin, in others as well as to recognize righteousness and sincerity. Students of Christian Science, therefore, pray that they may detect and uncover erroneous conditions or ungodlike qualities in themselves and others, that this wrong thinking may be corrected by the realization of the truth of being, or spiritual counterfacts. For the benefit of any newcomers to Christian Science, let it be understood that the mental correction should take place, first of all, in the thought of the student. For instance, if one is confronted with a condition in another which indicates dishonesty or any other form of sin, the student of Christian Science knows that, in place of a false, materially-mental impression of man as a poor, miserable sinner, he must work mentally to correct his own thinking by substituting the truth concerning man as made in the image and likeness of God, man capable of expressing, or reflecting, only Godlike qualities.

Again, for the benefit of the newcomer, it may be well to mention briefly the distinction which existed originally, and which is retained in Christian Science, between Jesus as the name of the human being and the Christ as his divine title. "Thou art the Christ," said Peter, "the Son of the living God" (Matt. 16:16). Peter's declaration could be paraphrased, "Thou art the Anointed One—the Messiah, or Saviour—for whom the Jews have been waiting, watching, and praying."

On page 312 of Science and Health, Mrs. Eddy has written: "Jesus' spiritual origin and his demonstration of divine Principle richly endowed him and entitled him to sonship in Science. He was the son of a virgin." Mary's purity of thought and spiritual perception of man as an idea of God, instead of a materially conceived embryo, enabled her to bring a son into the world spiritually empowered. To his fellows, Jesus appeared as a human being; yet, as our Leader states, "he was endowed with the Christ, the divine Spirit, without measure" (ibid., p 30). This duality of Jesus and the Christ enabled him at an early age to perceive spiritually his own, or man's, true being. He apprehended true creation as spiritual ideas of God, contrary to the generally accepted thought of mankind that man is a product of the sensual or physical. Jesus' birth was under authority, his ministry, his resurrection from the grave, and his final ascension, all testified to his unqualified recognition of the government of God and of his inseparability from Christ, or Truth, which demonstrates that government.

Restoring to Original Purity

A definition in Webster's dictionary of the verb "heal" is, "to restore to original purity or integrity." And that is the purpose of Christian Science. Let us note particularly the word "original." We seek to restore our individual concept of man and the universe to their original condition of purity or integrity. This restoration is not a physical operation, but a distinctly mental process, a spiritually mental process. Purity and integrity in their higher meanings are spiritual qualities.

The writer of the first chapter of Genesis had a clear sense of spiritual realities, or the Science of Being, for he furnishes a distinctly logical explanation of life in its various aspects. The spiritually-minded have been receptive to the Christ, or truth of God, in all times, and have been divinely inspired to express and to record their revelations. On page 333 of the textbook, Mrs. Eddy has written, "The advent of Jesus of Nazareth marked the first century of the Christian era, but the Christ is without beginning of years or end of days." A little later on the same page we read, "Abraham, Jacob, Moses, and the prophets caught glorious glimpses of the Messiah, or Christ which baptized these seers in the divine nature, the essence of Love." It is not inconsistent to say that centuries before the Master taught and practiced Christianity, Christian Science was recognized in some degree by spiritually-minded persons as embodying the idea of true identity and existence. It does not mean that the truth concerning God and man was known as Christian Science. This name was given by Mrs. Eddy to her discovery of the rules of spiritual healing and to designate the law of God, which she found underlies all true being. A marginal note in the Christian Science textbook reads, "Christian Science as old as God" (ibid., p. 146). Christian Science was not invented or originated by Mrs. Eddy. Through divine revelation and her consecrated labors she discovered it. The law was ever in operation. The law must have been in operation or there would have been no creator and no creation. God and spiritual law are one and the same.

Creation cannot differ in substance or quality from the creator. Cause and effect is one. God, Spirit, the first and only cause, produced and still produces spiritual effect. It is the law. For creation to express Life, the creator must be Life. Hence, God, Spirit, and Life are one and the same. God can be cognizant only of His own being and His own creation. As Life, God is not cognizant of death. His creation, consisting of individual expressions of Himself, Life, cannot be cognizant of death. Death being unknown to God, death is unknown to His image and likeness, man. Death is a phase in the dream of mortal existence—a phase of the belief in a power apart from God—a belief, not the truth.

That you and I appear to be here in the flesh, each with his own personal viewpoints on many subjects, shows that mankind believes in a material creation and that man is a human being. In other words, mankind believes in a power apart from God. So we need to define whom and what we mean when we discuss man from the standpoint of Christian Science. Christian Science admits no power apart from God. How could it, if it is the truth concerning the law of God?

We will agree that there is a thought generally held in the world that individuals are persons, humanly conceived, who are here for a certain number of years but are subject at any time to sickness and death, and who have an ability, if not a propensity, to sin. When we talk about man in Christian Science we have reference to the God-created man mentioned in the first chapter of Genesis. It is the purpose of this talk to endeavor to present this real man, as we term him, in a manner understandable to the newcomer, and to help raise our own individual concept of selfhood away from false, material beliefs of sinfulness, sorrow, sickness, lack—discord in any form—into a higher understanding of our individual inheritance as a child of God, an inheritance reflecting the divine nature and qualities.

Spiritualizing Consciousness

To enjoy this inheritance we need to know as much as possible of the truth concerning God, and, in addition, our right to exercise this knowledge in overcoming inharmonious situations of every kind. That we, individually, possess consciousness is proved by the fact that we have the ability to think. It is this consciousness, which humanly speaking we call our mind, that needs to be restored through spiritual understanding. On page 254 of Science and Health our Leader says, "The human self must be evangelized." And she adds, "This task God demands us to accept lovingly to-day, and to abandon so fast as practical the material, and to work out the spiritual which determines the outward and actual." This is a healing process by the power of God. Let us remember that the name or power of God signifies also His attributes and qualities. Representing God, therefore, means expressing only those attributes and qualities.

We are all familiar with Paul's admonition, "Let this mind be in you, which was also in Christ Jesus" (Phil 2:5). Jesus expressed and reflected the power of God, infinite Truth. Divine Mind is a synonymous term for God. The individual human mind or consciousness is not and cannot be a reflection of the divine consciousness, or Mind, called God. By its very nature the human mind is partly good and partly bad; but by our ability to reason from the basis of spiritual causation, and by our willingness to discard or mentally destroy thoughts which we realize are not Godlike, we purify our own thinking. This is a restorative process, a process which will eliminate the false beliefs of the human mind, as such, and awaken us to glorified being as God's own likeness, perfect and eternal—a task which God, Mind, demands us lovingly to accept today.

A friend of ours was invited to take a class of small boys in a Christian Science Sunday School. It was her first experience and she was not quite sure she could meet the requirements, especially when one little fellow asked, "What became of Jesus' body when he went up into heaven?" She countered the question by saying in effect, "I don't know, but we'll ask God and have the answer next Sunday." When they met the following Sunday, it was the little boy who had the answer. "I know what became of Jesus' body when he ascended," he said; "he just became gooder and gooder until there was no bad to be seen."

Various Aspects of Deity

In her meditations upon God which resulted in her discovery of Christian Science it was revealed to Mrs. Eddy that the titles for God are signified by seven all-embracing terms. Each of these terms although synonymous conveys to human thought various aspects of Deity. Before going further let me name these seven synonyms. They are Mind, Spirit, Soul, Principle, Life, Truth, Love. Meditating upon their meanings and expanding on the qualities of each, we broaden our concept of Deity to an extent possible in no other way. By the same token, our knowledge of true selfhood is expanded, for we have already seen that to represent God, to heal in His name, we must seek to express, as well as to understand, His qualities. We have already touched briefly on God as Life and as divine Mind, and we have agreed that God is Spirit.

Let us now think of God as Principle. The more we ponder this revelation, the more we perceive that God cannot be less than or other than divine Principle. Law manifests Principle. We are speaking, of course, of spiritual law. Principle admits no error. Spiritual law admits no error. Principle knows no mistake. There can be no mistake in God's law. Mind, Spirit, Life, Principle are one and the same. What has this fact to do with you and me, and what bearing does it have on our acknowledgment of God as the authority under which we act?

Predicated on what has been said about spiritual creation, we must admit that man is an individual consciousness which reflects or expresses the spiritual qualities of the creator. Limitation cannot be attached to the creator, for limitation is an admission of material sense, which is finite, and not an attribute of Spirit, which by its very nature is unlimited, or infinite. Spiritual creation, therefore, is infinite—a fact which may be hard for human thought to comprehend. However, as human beings grasp, through spiritual perception, the significance of this great fact, they realize that every expression of life and intelligence is, in reality, an expression of God's being—of Life itself—not the physical form which the eyes behold or the character which mortal mind attaches to it. The multiplication of these expressions of Life gives indication of the vastness of God's creation. Metaphysically speaking, each is an individual idea of God, separate and distinct, expressing individuality, yet possessing only Godlike or Christlike qualities. On page 503 of the textbook Mrs. Eddy writes, "These ideas range from the infinitesimal to infinity, and the highest ideas are the sons and daughters of God." Following this line of reasoning we obtain some concept of the state of being which Christian Scientists seek to understand. Humanly speaking, we have a long way to go, yet the road grows brighter with each demonstration we make of the power of God, demonstrations brought about by the correct application, mentally, of the rules of Christian Science, proving the ever-presence of God, Principle, and thus bringing hope and confidence as well as healing and regeneration into our earthly experience.

The more we grasp the facts of spiritual creation, or spiritual causation, the more clearly does real selfhood dawn on the understanding, as opposed to the material belief that you and I are merely flesh and blood with something called a brain which enables us to think. Rather do we recognize our consciousness as embodying individual eternality, indestructibility and perpetual reflection of the power, presence, and qualities of God. And it is this spiritual conviction which inspires us to acknowledge our God-given authority to heal in His name—to resist mentally all that is unlike Him—in short, restore to original purity or integrity the individual concept of ourselves and others. And it is essential that we start with ourselves.

We all remember the Biblical command to love one's neighbor as oneself. An aspect of loving is understanding. We need to understand our neighbor as we understand ourselves. It follows that this is possible only when we know or understand ourselves. When we arrive at definite conclusions regarding our true selfhood as an expression of God's being, we cannot fail to have arrived at the same conclusion regarding our neighbor. Conversely, so long as we attach ungodlike qualities to our neighbor we have failed to reach a full understanding of our own true being. As we saw a moment ago, Principle knows nothing of error, cannot see or entertain error in any way. If it did, it wouldn't be Principle. Hence an expression of Principle, which we know to be true manhood, cannot be cognizant of qualities unlike Principle.

Practicality of Christian Science

Let us see where this line of reasoning takes us in everyday affairs—in other words, its practicality. We should return to what was said about Jesus and his attitude toward his critics as well as toward those who were earnestly seeking the Christ. Jesus differentiated between hypocrisy and sincerity. He condemned the one in no uncertain terms while he encouraged the other with patience and love. He admonished his followers, "Judge not, that ye be not judged" (Matt 7:1). Yet he warned them, "Be ye therefore wise as serpents, and harmless as doves" (Matt. 10:16). In the light which Christian Science throws upon the Bible, there is nothing conflicting in these sayings of the Master. Perhaps the experience of a somewhat new student in Christian Science may illustrate.

This young man belonged to an organized group of citizens and acted as their treasurer, the funds being kept in his personal account at the bank. A member of the group, knowing this, asked him to endorse a check which he had drawn on his home-town bank situated several miles away. The endorsement was made in good faith, but a few days later the endorser's bank called to say the check had been returned marked "No account," and informed our friend his own account would be charged with the amount. This was quite serious, for the sum was far greater than he could afford to lose. He knew immediately that this was an occasion when he would have to turn to God for guidance. Humanly speaking, he didn't know what step to take. Who was he to sit in judgment on the other one and jump to the conclusion that his colleague was dishonest? On the other hand, was it right to be imposed upon? Although not feeling sufficiently confident to detect guilt or innocence, he became convinced that God, divine Mind, would direct him. After a few preliminary moves and viewing the circumstances as closely as possible from the point of Principle, much against his personal inclinations he swore out a warrant for the other's arrest. The case went to court, and restitution was arranged. As the two men walked away together, the defendant turned to the Christian Scientist and expressed deep gratitude for what had been done. He said that he would hate to think what might have happened had he been allowed to get away with the fraud, and that now he wanted something of what the other had. Asked what this was, the reply was, "Christian Science."

It should be said this incident occurred in the early days of World War I. Several months later the two met again. They were in uniform. The one who had formerly been arrested was engaged in what was considered a particularly hazardous duty. But he made light of it, saying that he was so grateful to have obtained some understanding of Christian Science, and he knew that God protected him in all he was called upon to do in line of duty.

The point I am making is, had the Christian Scientist followed his human desire to refrain from taking what seemed to him drastic action, there is no knowing what might have resulted. Listening to the dictates of Principle, realizing the government of the one divine Mind, and acting without prejudice or resentment, both persons were greatly blessed. It was a healing of sin by the power of God.

Explanation of Soul

To many persons, especially those of us who were brought up in an orthodox religion, the meaning of the word "soul" was rather mysterious. I remember, as a boy, being told that upon the passing of a member of the family angels came and escorted the soul of that loved one to heaven. My parents were seriously religious and believed what they said. A strange "something" which had existed within the physical body was released by death and, unseen to human eyes, made its way skyward, there to wait judgment upon the deeds and misdeeds of its former owner. This is not said with any disrespectful or flippant thought. On the contrary, I am intensely serious, for a proper understanding of soul is of great importance to the study and practice of Christian Science. Christian Scientists are profoundly grateful to Mary Baker Eddy, and her logical yet divinely inspired explanation of soul is one of their reasons for gratitude.

Mrs. Eddy makes a distinction between Soul, capitalized, and soul spelled with a small "s." The former she shows to be synonymous with God, while the latter means sense. And in this connection we need to distinguish between the sense which is material and the sense which is spiritual. This distinction enables us to read the Bible intelligently, for with these differing meanings in thought we can separate, mentally, the soul which is "cast down," as was David's on occasions, and the soul of Mary which magnified the Lord. Material sense cannot magnify the Lord, neither can spiritual sense, which is God-derived, be cast down. As we need a definition of man in order properly to discuss Christian Science, so do we need a definition of soul. Much misunderstanding, or perhaps lack of understanding, is due to an inability to agree on the meaning of these words.

In this discussion we have seen that the real man expresses or reflects God's true nature. His attributes and qualities. The real man, therefore, reflects the qualities of Soul, God. We cannot obtain the faintest understanding of Soul through material sense, any more than we can of God. We cannot impute sin to Soul, for sin is unknown to Principle. Hence we find God, Soul, and Principle to be one and the same. What does this mean to you and me?

As individual ideas of God, conscious through spiritual sense of expressing God, you and I express Soul. One attribute of Soul is immortality. It follows that an individual expression of Soul is an individual expression of immortality. Your consciousness, and mine, too, are immortal. I do not mean this material identity which is recognizable only through physical perception, but our spiritual identity—our original purity or integrity which Christian Science enables us to restore, here and now, to the extent that we gain clearer, correct views of God and of His spiritual creation. On page 477 of the Christian Science textbook we read: "Soul is the substance, Life, and intelligence of man, which is individualized, but not in matter." Note that Soul, God, is individualized as man. Individual man's true identity is a reflection of Soul. And this reflection is substantial. It reflects the divine substance of Spirit. Mankind believes matter to be substantial. It calls that substance which can be handled physically; but that is not substance because it is not eternal.

Here again we find that Christian Science metaphysically interprets the meaning of a generally accepted term. Why? Because all these meanings are based on what is understood to be real as against what is considered unreal. Mankind contends that what it believes to be real or substantial is more than imaginary or confined to material perception—in a word, that which can be recognized by the physical senses. Yet it has been demonstrated that all material substance, so called, can be dissipated to the point where the physical senses cognize it no longer. That which was considered to be real is proved to be unreal, for it ceases to exist, as mankind regards existence. Christ Jesus said, "Heaven and earth shall pass away, but my words shall not pass away" (Matt. 24:35). The Christ, Truth, expressed by Jesus is real. Truth is substance because it is indestructible. Substance, as Christian Science explains it, cannot include any discordant element. Soul cannot experience sickness, suffering, or lack. Therefore, as Soul is the substance of man, man cannot experience sickness, suffering, or lack. Man lives in Soul, therefore man never lacks substance. This is a most reassuring truth and is pertinent in refuting many false, material suggestions.

Physical Healings

A friend of mine tells of a healing in Christian Science experienced by his father and which he witnessed. Over a period of seven years the father had spent considerable time in a hospital, had been operated upon six times, and had to submit to extremely painful dressings. Conditions reached the point where it was thought nothing more could be done for him, and he was given up to die. Christian Science was introduced and accepted. During his illness the patient had acquired the drug habit, and he relied upon morphine capsules to relieve him from pain. The morning following his first Christian Science treatment he went downtown to the druggstore, and, as was his custom, presented the prescription and tendered a dollar in payment. After the druggist had placed the box of capsules in his hand, my friend's father said suddenly, "I don't want this," laid it down, and left the store.

Upon returning home he told his family what had taken place and said he had no recollection of having gone to the drugstore in the first place, much less asking for the morphine capsules, and it was as though he had suddenly awakened when the box was handed to him. This healing was instantaneous and permanent. Pain soon ceased under Christian Science treatment, and an unsightly bodily condition was restored to a normal state in color and texture. When Christian Science treatments commenced, my friend was requested not to look at the father's wound. At the end of ten days he was requested to look at it again, this time to confirm that others were not dreaming because the healing was, to them, so remarkable. What had seemed to be lost substance of flesh was being replenished.

This healing in Christian Science made such a profound impression upon the inhabitants of the small midwestern city in which it took place that one who had been a periodical drunkard for over thirty years turned to Christian Science for help. A practitioner visited him in his room, where he had been in a drunken stupor for two weeks. When the practitioner left, the man reached for his bottle of whisky, intending to take "just one more drink." Instead, he placed it back on the shelf, remarking in strong terms that if the Christian Scientist was fool enough to trust him and leave the bottle within reach, he would live up to the trust. Long before the practitioner reached his home, to which, incidentally, he trudged in a blinding blizzard, the patient was mentally clear and was calling for food. This instantaneous healing occurred on a Christmas Eve, and the following day was the occasion for a happy family gathering. The man's legal practice began to grow rapidly, and in a few years he was in receipt of a substantial income. His thought of lack of substance underwent a complete change.

My friend himself had a beautiful healing in Christian Science. When he was about seventeen years of age he was stricken with pneumonia for the fourth time. This was soon after his father had received his own healing; yet the father's faith in Christian Science had not reached the point where he would rely upon it for the healing of his son. Not until two physicians had said nothing more could be done, did the father telegraph to a practitioner in another city for treatment. The boy had been unconscious for many hours. Immediately after Christian Science treatment was commenced he regained consciousness, sat up in bed, and insisted upon getting up. In ten days he was back in school. These healings made such an impression on my friend that he readily accepted the truth of Christian Science as presented by Mary Baker Eddy although, he admits, at first he did not understand much of what he read. Through the years, however, he has been an active, working Christian Scientist, and his own realization of substance as spiritual has been objectified.

For the benefit of the newcomer let it be said that there is no formula for Christian Science treatment. Each prayer, or treatment, in Christian Science is an unfoldment and expansion from basic truths. Spiritual refreshment and inspiration are ever requisite, and the student of Christian Science prays for and is alert to the reception of these elements. Mere repetition of memorized statements from the Bible and our Leader's writings is not, in itself sufficient, although study of the word is indispensable and promotes spiritual understanding. The correct answer to any question can be obtained only by realization of Truth, accompanied by correct application of the rules of Christian Science. Our approach toward the solution of any difficulty, whether it seem personal or whether we are called upon to help another, is heartened by the knowledge that Christian Science empowers us to meet and to master every discordant situation.

Crusade Comes to Lemon Grove

Grant Hadley has been appointed chairman of the Crusade for Freedom in Lemon Grove. He will be assisted by A. P. Sonka and Forrest Baxter.

General Lucius Clay is directing the Crusade for Freedom in Europe with an independent, citizen-supported station, Radio Free Europe.

It identifies quislings and informers by name. It reports on disappeared persons. It sends messages from escapees. It spikes Red propaganda lies. It spreads news the Soviets try hard to suppress. For example, a recent program gave the citizens of Lednicke Rovne, in Czechoslovakia, the name and description of the Communist agent directly responsible for the murder of their parish priest.

Other broadcasts bringing the captive peoples their own music, literature, history and religion—all banned by the soviet dictators.

Radio Free Europe first began broadcasting July 4, 1950, from a small short-wave transmitter in the Frankfurt area of Western Germany. On its programs Czech exiles speak to Czechs, Poles speak to Poles, Hungarians speak to Hungarians, etc. The broadcasts are entirely in terms of the interests of the imprisoned peoples . . . designed to keep alive their hope of freedom, and encourage resistance to Communism.

All patriotic men, women and children are asked to enroll in the 1951 Crusade for Freedom by signing a pledge to resist Communism and tyranny with the weapons of truth. A modest silver offering is asked from each one enlisting.

The purpose of the committee is to set up facilities in public places for local citizens to the Freedom scroll.

Business Women's League

The Business Women's League met at luncheon followed by a business meeting last Thursday at Lemon Grove Community Center. Guests presented were Mmes. Peggy Kraft of St Louis, Mo., Mildred Alkire, Sally Thomas, Anna Bettinson, Kitty Johnson.

Mrs. E. A. McGuire has been re-appointed as representative for the League on the Lemon Grove Community Christmas Tree committee.

Mrs. B. C. Snyder, chairman, reported that the club year book is nearly completed and that it will be presented at the next regular meeting which will be held at Rose Hedge Manor in La Mesa, Thursday, October 4. The last car to accommodate those who are not driving their own cars will leave the Lemon Grove Theatre promptly at 12:15. Luncheon will be served at 12:30. Reservations may be made with Mrs. James Snodgrass, H 6-3489.

Toastmistress Club

Woman's Place in a Democracy was the topic for a round table discussion led by Mrs. David Hentigan at the Suburban Toastmistress Club meeting held at Porter Park clubhouse Wednesday evening. Mrs. Al Ross and Mrs. Max Lohse also participated in the discussion.

Mrs. Merle Mc Pherren presented a short educational program on Round Table discussions.

Mrs. Howard Jenning was lexicologist; Mrs. Alice Yeager, topic mistress and Mrs. Howard Stiner, evaluator. Each member gave her definition of democracy.

New Schools

Continued from page 1

out that the state of California has now made available millions of dollars for needed construction of schools here.

Now the San Diego area has been named as one of the three critical defense areas. It should be called to the attention of the National Production Authority that this defense area needs more and more schools because of the increasing enrollment and that school construction is a definite part of the defense effort. If suitable schools are not found by the new workers to our area, many will be forced to leave and seek employment in less crowded districts.

Hunters Should Use Caution to Prevent Fires

California Division of Forestry officials ask that all hunters using wild lands during the next month, make every effort to prevent forest fires from starting.

Deputy State Forester, James K. Mace, Riverside, points out the explosive conditions, low humidity, high temperature and variable winds, along with the tinder dry cover, results in extremely rapid spread and the greatest difficulty of control experienced on the fire in the Banning area as an example of what can happen once a fire has started.

Every precaution by those frequenting the tinder dry area of timber, brush and grass lands, must be used to prevent a recurrence. This fire destroyed over 13,000 acres of valuable watershed and recreational lands.

In addition, there has been an untold number of casualties among the wild life in that area. Hunters are requested to observe all closed areas and the laws governing the use of fire while enjoying areas which have been made tinder dry by the years of light rainfall and high temperatures.

Public Notices

IN THE SUPERIOR COURT OF THE STATE OF CALIFORNIA IN AND FOR THE COUNTY OF SAN DIEGO

Elizabeth Brown Maidment, Plaintiff

vs.

J. H. Maidment, Defendant

SUMMONS

Action brought in the Superior Court of the State of California in and for the County of San Diego, and the complaint filed in said County of San Diego, in the office of the Clerk of the Superior Court.

The People of the State of California Send Greetings: To J. H. Maidment, Defendant.

YOU ARE HEREBY DIRECTED to Appear and answer to a Complaint in an action entitled as above, brought against you in the Superior Court of the State of California, in and for the County of San Diego, within ten days after the service on you of this summons—if served within this County; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract or will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and seal of the Superior Court of the County of San Diego, State of California, this 7th day of August, 1951.

T. H. SEXTON, Clerk
By R. W. CONDEE, Deputy
SEAL OF SUPERIOR COURT
William N. Gilliam, Attorney.

APPEARANCE: A defendant appears in an action when he answers, demurs, or gives the plaintiff written notice of appearance. The appearance must be in writing, accompanied by the necessary fee and filed with the Clerk.

Published in Lemon Grove Review, August 9, 16, 23, 30, September 6, 13, 20, 27, 1951.

Reviewing Sports

By ROGER CONLEE

Highlander Tiff
St. Augustine Eleven

The Helix and St. Augustine High School football teams meet this Saturday night at 8:00 at Hoover Stadium.

The Highlanders are underdogs to the improved and heavier Saints. St. Augustine, playing its first season as an independent, has a heavier line than did their Catholic League entry of last season.

The Helix eleven is playing its first full game of the season. They met the Kearny Komets in a 15-minute period last Friday as part of the City Football Carnival.

Although outscored, 7-0 by the Komets, Helix looked quite impressive in its grid debut before 22,000 Carnival fans in Balboa Stadium. Backs Ronnie Oriuskie, Ernie Merk and Tom Kelly looked very good. Ends Jerry Hurst and Howard Fackrell looked exceptional, and they, along with Oruskie, could be listed as All-League candidates.

While not expected to defeat St. Augustine, the Highlanders probably will make a good showing of themselves. Coach Ken Maynard's crew showed fight in its brief Carnival showing and it proved they are a spirited bunch of boys.

All in all, Helix's football fortunes aren't actually as woeful as many were led to believe. They'll show St. Augustine a tough time.

Stephen Batchelder, Helix's first football casualty, suffered a broken ankle the first day of practice, but is now able to get around without a crutch.

Staters After Fourth Straight

The San Diego State Aztecs are after their fourth straight football triumph and their second in succession this season when they meet the Pacific Fleet Submarine Forces squad this Saturday night in Aztec Bowl. The Submarines, one of the stronger local service clubs will give the Aztecs a tough battle, it was generally agreed.

The San Diegans opened their season on a sweet note last Friday night by trouncing San Francisco State, 32-14, on the latter's grounds.

Pigskin Picks

Illinoise over UCLA by 7.
Washington over Minnesota by 7.
Kentucky over Mississippi by 13.
Michigan State over Michigan by 7.
Northwestern over Colorado by 20.
Ohio State over So. Methodist by 14.
Oklahoma over William and Mary by 14.
Tennessee over Mississippi State by 9.
S. D. State over Submarines by 7.
St. Augustine over Helix High by 10.

Prediction average for season 75%.

Jamul Las Flores

By MRS. H. I. HAGMAN

The Jamul Las Flores Community Club held its September meeting in the Oak Grove on the new school grounds last Friday with President William McCune presiding.

William Bennett reported on the progress of the new school, the plans have had final approval, have been accepted and now are ready for bids.

The Club donated $25 to the 4-H Club to help toward its project of remodeling the old barn in the Oak Grove for a meeting place.

Mr. Lacy volunteered to be social chairman and is planning some Saturday evening dances on the cement slab in the Oak Grove as long as the weather is favorable for outdoor gatherings.

Mr. Parnell had a petition for the straightening of the curves on the Lawson grade to the junction of the Lawson and Lyons Valley road.

A large crowd was present. Several new members were welcomed into the club. A social hour followed.

Refreshments were served by the hostesses; Mmes. Olivitz, Impink and De Russe.

Forward Club Jrs.

The Forward Club Juniors whose theme for the year is "Build Freedom With Youth," will try to get traffic signals at crucial crossings in Lemon Grove, Mrs. O. L. Meyer was appointed chairman of the project at the meeting Tuesday evening.

Mrs. Jerry Walter was presented a spoon for her baby daughter.

The evening was spent with games and entertaining 25 guests who are prospective members.

Personal Briefs

Ralph Richardson, 2458 Bonita, and Howard Hawkins, 2058 Washington, attended a model airplane meet at Airliners Field in Mission Beach on Sunday.

Mrs. George E. Leonard, 8432 Golden, received first award on a crocheted dinner cloth entered in the Domestic Arts Department at Los Angeles County Fair at Pomona.

Mrs. Charles Foot and son Charles, 2648 Citronella, returned recently from Shiloh, Ohio, where they had spent the summer. Mr. Foot went back East with them in June but only remained for three weeks.

Mrs. Don Beebe, 1607 Taft, received Theta Omicron Chapter of Beta Sigma Phi Sorority at her home Monday evening. Mrs. Herman Carpenter directed a program on "Oratory." Mrs. Don Potts was a guest.

Mr. and Mrs. Foster Hawkins, 2058 Washington, entertained at dinner Monday evening, honoring their son, Howard, on his birthday anniversary. Guests were Danny and Donna Ahrensberg, Robert Burke, Jim Parsons and Ralph Richardson.

Miss Gertrude Scovel, Director of Religious Education of the First Congregational Church, returned last Sunday evening from a hurried trip to Seattle, Wash., to be with her sister who was taken ill suddenly. Miss Scovel reports that her sister is rapidly improving. She also visited her father in Salem, Ore., on the way home.

Mr. and Mrs. Curtis L. Paxton of Rochester N. Y. left this (Thursday) morning after a visit of three weeks in the home of Mr. Paxton's brother-in-law and sister, Mr. and Mrs. L. F. Leech, and his mother, Mrs. Beryl Paxton, 2167 Eldora. Last week end Pfc Paul Paxton, U. S. A. of Camp Irwin, was also their house guest.

Mrs. Randolph Morse, 8354 Golden, was happily surprised on her birthday anniversary when Mrs. Wayne Johnson served a turkey dinner in her honor Monday evening. The table, beautifully appointed with chins brought from England by the Johnsons was centered with an arrangement of varicolored plumbago. Covers were laid for Eliot Beddoe, of La Mesa, Mr. Morse, Mr. Johnson, Phil Johnson, the honoree and hostess.

Darlene Partyka, daughter of Mr. and Mrs. Stanley Partyka of 9455 Crest Drive, Spring Valley observed her fifth birthday last Sunday afternoon with a party at her home. Those present were, Patty and Susan Reed, Susan and Kathleen Zellmer, Peggy Hedges, Maureen and Dennis McCormick and Darlene's two sisters, Lisa and Marbeth Partyka.

Representing local 4 H Clubs of Lemon Grove area, Sonia Frederickson of Vista La Mesa 4 H Club, was one of 100 girls who modeled garments made by the girls at the Los Angeles County Fair, Pomona, on Saturday. Mr. and Mrs. Schickedanz and son Dale and Patsy Burke also were at the Fair. They were all guests of Mr. and Mrs. Robert Mallette of Pomona over Saturday night.

LEMON GROVE PTA NEWS

The first regular meeting of the Lemon Grove School P.T.A. was called to order by Mrs. S. K. Solleder, president, last Thursday evening, in the school cafeteria. Following the flag salute, led by T. R. Purves, the capacity crowd of parents and patrons sang "The Star Spangled Banner." Mrs. Channing Mason announced the opening of the membership drive for the month of October. She stated that ribbon awards would be given to Junior school students for outstanding posters for the contest, and that room prizes of five, three, and two dollars would be made to the classes at the school with the highest percentage of membership.

Mrs. H. T. Espe and Robert Sutton, co-chairman for the Hallowe'en Carnival, spoke briefly on plans for the fund-raising event to be held next month. Mrs. T. E. Courtney, magazine chairman, told of the advantages of both the California and National P. T. A. magazines for which subscriptions are now being taken.

The 1951-52 budget of the association was presented by John Blain, auditor, and adopted by the assembly.

Mrs. E. M. Kinyon, program chairman, introduced Officer Coates of the State Highway Patrol, who discussed safety regulations for school children. He urged parents whose children are now serving on the School Safety Patrol to encourage their continuing in service during the entire school year. He also stressed the importance of children using the school crossing at Imperial and Broadway where protection is offered and the importance of children who must walk along the highway using the left shoulder. Students on bikes, however, should ride on the right, with traffic, making sure that the vehicle is equipped with lights for after-dusk riding.

This month new regulations concerning school buses will be adopted throughout the State. Officer Coates explained that when the new lights on these buses are flashing off and on, all traffice meeting or overtaking the vehicle must come to a complete stop and not resume motion until the warning signals have stopped. These signals will be used by the drivers only when children loading or unloading must cross the highway in front of traffic.

The only exception to the new regulation is made in the case of on-coming traffic on the far side of a divided highway. The Lemon Grove community has a good traffic record in regards to the schools, and the State Patrol is hopeful that the record will be kept here. It is the duty of both the school and the parents to see that it is kept.

Mrs. Evelyn Lauritzen, elementary school principal, and S. K. Solleder, intermediate school principal, introduced the teachers from their schools, and Mrs. Solleder introduced officers and chairmen of the organization. Then followed an informal hour of refreshments and group discussions.

Mrs R. R. Lairsay, chairman, and her eighth grade room mother representatives served cake and coffee to the many guests of the evening. All teachers and officers were presented with attractive, colorful corsages and boutonnieres made by Mrs. R. C. Taylor, Mrs. H. R. Alexander and Mrs. T. A. Keeton.

The next meeting of the Lemon Grove School P. T. A. will be held on Thursday evening, October 18, at 7:30.

At a special meeting of the executive board Thursday evening, Mrs. Harry R. Alexander was elected to the position of second vice president of the Lemon Grove P. T. A. She will also serve as hospitality chairman.

Lemon Grove School News

Dinner Meeting at Manor Hotel

The first social meeting of the Lemon Grove District Teachers' Association will be held this (Thursday) evening, at the Manor Hotel in San Diego. Over 100 teachers, administrators, trustees, other school personnel, and guests will meet for an evening of dining and entertainment in honor of the new teachers to the district.

Robert Sutton, club president, will give the welcoming address, and Mrs. Agnes Rodgers, social committee chairman, with her committee, is in charge of the evening's program.

Three Teachers to Attend Leaders Conference

Robert Sutton, club president, Clarence H. Allen, club treasurer, and Margaret L. Darroch, public relations chairman, will represent the Lemon Grove District Teachers Association at the eleventh annual Leadership Conference to be held at Camp Seeley in the San Bernadino Mountains this Friday, Saturday and Sunday. The conference is sponsored each year by the Southern Section of the California Teachers Association for local organization officers. Here they have an opportunity to plan programs and discuss topics of mutual interest in a friendly and informal athmosphere.

Dr. L. W. Ashby, of the NEA, and Dr. A. F. Corey, executive secretary of the CTA will be among the outstanding speakers on the three-day program.

Following their return, the three representatives will report to the local association at the October business meeting, scheduled for October 25.

This week the Lemon Grove School P. T. A. sponsored a membership poster contest in the eighth grade art classes at the junior high. Ribbons of merit were awarded by the judges to the following students: Dorothy Jiron, 8-2 class, first place; Andy Wyatt, 8-3 class, second place; Robert McGowan, 8-2 class, third place. Honorable mention, Janet Henderson, 8-1; Grant Ballantine, 8-1; Allen Newton, 8-1; Linda Leach and Richard Gould, 8-2; Sylvia Barr, John Dial, Burton Young, 8-3; Deanie Whalen, 8-4. Miss Elizabeth Robbins is the art teacher for the groups.

Miss Robbins also announced this week that two honorable mentions were received by eighth grade students of last semester in the Fire Prevention Education Poster Contest, sponsored by the Southern California Conservation Association and the Division of Forestry last spring. Albert DeMars and Lee Johnson, both students now at Helix High School, received certificates of merit from the board of judges. Presentation was made by James G. Fenlon, State Forest Ranger of San Diego County.

This is to be a yearly contest, staged for the purpose of bringing home the lessons of conservation of our natural resources.

Election of Room Officers

More class officers were elected this week at the Lemon Grove Junior High. In Mrs. Whalen's group—Wayne Pinterick, president; Jimmy Goetz, vice president; Dale Finch, secretary; Tommy Best, treasurer. Jeannie Little, Eddie Patterson, Geraldine Renfro, Peggy Moore, Winton Glines, and Blair Angeves, class programs.

Mr. Butler's 8-2 class—Dorothy Jiron, president; Tommy Halvorson, vice president; Marjorie Jackson, secretary; Monty Dickinsen, treasurer; Arvis Reed and Jackie Lairsey, student council representatives.

Mr. Butler's 8-1 class—Patsy Burke, president; Karen Dawson, vice president; Sonja Frederiksen, secretary; Ronald Oaks, treasurer, Grant Ballantine and Kristin Johnson, student council representatives.

As has been his policy in past years, John van Gilse, owner of the Grove Theatre, will continue to honor the members of the Lemon Grove School Safety Patrol with a Saturday matinee. Attending this week will be Robert Davis, Gary Calvert, James Herrera, Keith Hall, Roger Slaggil, Paul Jernigan, Ward McMakin, Jimmy Dial, and Kenneth Hill. Charles Bauer and Warren Sperling will also attend as school safeties. William H. Firtch, fourth grade teacher, will sponsor the patrol this year and John Strawn, also a fourth grade instructor, will sponsor the school safeties.

Child Study Group

Mrs. Margaret Darroch and Mrs. Evelyn Whalen, teachers at the Lemon Grove Junior High, attended a meeting at the Schools Service Center in San Diego along with representatives from Chula Vista, Lakeside, Oceanside, La Mesa, and National City last Saturday. The group met with David Barnes, county schools coordinator, for the purpose of organizing Prescott Child Study Groups for teachers in this district.

A second year group, led by Mrs. Emma Tait, is already organized here. The first year group will meet at the school on the first and third Wednesdays of each month at 7:00 p. m. Second year group members will meet during the second and fourth weeks of each month, beginning in October.

Monterey Heights PTA News

Monterey Heights P. T. A. helped make the Ninth District Workshop held September 18 at the Mission Hills Congregational Church a success again this year. Those who attended were Mrs. J. A. Setchell, Mrs. J. F. Hopkins, Mrs. Frieda Lockhart, Mr. J. A. Finkleman, Mrs. M. F. McKinney and Mrs. A. G. Guy.

The membership drive started Monday under supervision of Mrs. Jewel Jones. Prizes will be given to the rooms which gets the most members.

Helix High PTA

The first Fall meeting of the Helix High Parent Teachers Association will be at a pot-luck luncheon on October 25. A program of this meeting will be mailed to each member.

The membership drive started Monday, September 24th with their goal set at one thousand. Be a member of your P. T. A., support and know what is going on at Helix High.

Vista La Mesa PTA

The meeting night of the Vista La Mesa P. T. A. has been advanced to Wednesday, October 3, instead of the regular date, in the school kindergarten room at 7:15.

Dr. Joe Apple, from San Diego State College, is to speak on UNESCO.

Fifth Grade A. M. mothers, headed by Mrs. Billie Burke, will be hostesses. Child care will be provided.

Lemon Grove Stores open Friday evenings till 9.

WE GIVE S and H GREEN STAMPS

Lemon Grove Hannah BY THE CRESSY'S

"A genius is a guy who can do everything except make a living," says Hannah.

says Cressy's have some really wonderful values this week, especially in the children's department

SPORTLIGHT

Football Power in South This Year

By GRANTLAND RICE

OVER 300 N.C.A.A. colleges, embracing some 15,000 football players, have started the big jolting act. They have opened schedule that runs from September 15 to December 21, not including the various Bowls of New Year's day.

This means about as much football as even a football-minded nation can absorb without gagging.

The big gap will come from the absent stars of what would have been a magnificent Army team, now scattered to the winds.

The scramble for sectional supremacy will be as keen this season as it always is. What sector will take over the lead? East, South, Midwest, Southwest or Far West?

The complete wreckage of a powerful Army squad, the most drastic in football history, weakens the East no little. Army, Pennsylvania, Cornell, Navy, Princeton and Villanova had the East well up. Pennsylvania, Cornell, Navy and Princeton won't be too bad, with possibilities from Yale, Fordham, Dartmouth, and Columbia.

Grantland Rice

The South, combining both conferences, can offer a rugged challenge to anyone. The South can offer Tennessee, Alabama, Maryland, Miami, Kentucky, North Carolina, Duke, Georgia Tech, Georgia, LSU, with possibilities from Florida, Ole Miss and Mississippi State. Tennessee, Alabama, Kentucky and Miami are dead certain to be packed with TNT.

When you move to the Midwest, you step into one of the star spots of the game. Here you have Michigan State, Ohio State, Notre Dame, Michigan, Northwestern, Illinois, Wisconsin, Minnesota, Iowa and others.

This section is always one of football's strongholds. It is usually challenged by the South and the Southwest in louder tones.

• • •

Tornado Land

The Southwest is football's tornado land. The far-spreading state of Texas furnishes most of the dynamite, but not all of it.

From the Southwest we get Oklahoma, Texas A. and M., Texas, Baylor, S.M.U., Rice, T.C.U. and Missouri.

A Southwestern championship is usually a carnival of form slaughter where everything can happen.

Texas A. and M. will be high. So will Baylor and Oklahoma. We like Texas A. and M., plus Baylor. This sector may produce five teams to match any other five, I doubt that any other section will have four teams better than Texas A. and M., Baylor, Texas and Oklahoma. Not even the Midwest.

What about the Far West? So far the early autumn dope doesn't indicate too much strength. But the Far West has a possible champion in Washington, with strong teams at California, U.C.L.A., and Southern California.

Washington can be quite tough and so can U.C.L.A., where Red Sanders has done an exceptional job of coaching. The sectional struggle should rest with the South, the Midwest and the Southwest.

Here may be the five top teams—

South—Tennessee, Alabama, Kentucky, Miami and North Carolina.

Midwest—Ohio State, Michigan State, Notre Dame, Wisconsin and Michigan.

Southwest—Texas A. and M., Baylor, Texas, Oklahoma, T.C.U and Rice or S.M.U.

This time I like the South or the Southwest over the Midwest. Notre Dame and Michigan are not quite what they used to be.

• • •

The Autumn Stretch

NEW YORK—Saratoga is closed after a record month and the general excitement moves back to the Big Stem.

In the last month it seems that Princeton contributed another big winner to the new list. His name is John Gaver, trainer for the Whitney's Greentree stable, who is returning to New York tracks with a brace of thoroughbreds known as Hall of Fame and Tom Fool, two of the shining lights in the two- and three-year-old divisions.

The 1952 Kentucky Derby is now over eight months away. But there are more than a few sharp observers who have already moved Tom Fool into the front spot.

Mr. John B. Campbell will have to inspect Tom Fool, Cousin, Jet Master and also a couple of Calumet entries before he passes on his rating for the two-year-olds of 1951.

You may recall that last winter, Mr. Campbell named Uncle Miltie as the top horse with Battlefield ranked well up.

Uncle Miltie started like a shell from a howitzer until he broke.

Battlefield moved in to be the best three-year-old of the year, unless Greentree's Hall of Fame can take the lead during autumn's approaching stretch.

SPORTSMAN'S HORIZON

By JIM RHODY

Mystery Solved

Solved at last has been the mystery of the famous jumbo 70-150 Winchester Express cartridge which has baffled gun experts for the past half century. This largest sporting cartridge ever made by the New Haven sporting arms and ammunition company, has baffled the experts since it was first discovered on the 1888 cartridge boards which were common sights in sporting goods stores in the latter part of the last century.

The 70-150 was an experimental cartridge developed for the obsolete Model 1887 lever action shotgun equipped with a special rifled barrel, according to Paul Foster, Winchester ammunition expert in a copyrighted exclusive article in the new edition of the Gun Digest.

This most controversial of all Winchester cartridges was seventenths of an inch in diameter. The Model 87 shotgun was the first shotgun Winchester made.

Philip Jay Medicus, leading dealer in obsolete ammunition, estimates that only between 25 and 35 of these rare cartridges are still in existence. One is pictured in his new catalogue, and another in "Cartridges" by Herschel C. Logan, a standard reference work on cartridges. The H. P. White Company of Cleveland has several of these rare cartridges in its reference collection. The most recent sale of a 70-150 Winchester was for $20 for a single cartridge.

The Gun Digest article on "Forgotten Winchester" cartridges also describes 64 other rare and obsolete Winchester cartridges which will be news to the growing army of cartridge collectors.

△ △ △

Curbs Backlash

Ocean City Manufacturing Company has announced something new in blacklash controls, the EZ-CAST. It's a small, compact, detachable unit which can be quickly installed on any Ocean City Salt Water Reel having a left side-plate oil cap. It fits all such reels made since 1940 and many earlier models.

The EZ-CAST is completely self-contained, requires no oil or other fluid for operation. It is unaffected by temperature or climatic conditions; will not cut or wear the spool spindle. Once locked in, it will not back off accidentally . . . yet is readily interchangeable for use on other Ocean City reels if desired. Its plastic container may be used for a hook, fly or swivel box.

△ △ △

Butterflies can tell differences in the sweetness of liquids that taste alike to human beings.

△ △ △

Record Muskies

For the first time, a resort and fishing region is making an effort to keep track of all legal muskies caught.

It's being done through a season-long musky marathon conducted in Vilas county by Wisconsin headwaters country, the region's new promotion organization.

And the number of fish being reported is astounding everyone—old-time fishermen, guides, resort operators. Near the end of the season's sixth week a total of 842 muskies had been reported.

At that rate—an average of 140 a week—the 22-week season may produce as many as 3,000 of the big game fish reported from Vilas county lakes.

"Naturally, we're not hearing about all the muskies caught," says Merv Clough, executive secretary of the organization. "It's a big job educating everyone up here to the importance of reporting. But more and more are beginning to cooperate, and the count is mounting.

"We will have some mighty important figures and data to analyze by the end of the season."

At his office in Sayner where records are kept on the marthon, Clough reports that charts are being compiled on the lakes producing muskies, lengths and weights of the fish reported, and where possible, the type of lure used on each fish.

Biggest musky reported so far is the 50-pound, 56-inch tiger specimen caught in Lac Vieux Desert by Mrs. Dolores Ott Lapp, wife of Guide Jack Lapp in the Land O'Lakes area.

Other big ones have been reported in the marathon. There have been two weighing 43 pounds, one each at 41 and 40½ pounds, two at 36, and 35 and 34-pounders. A check on the first 500 reported showed an average weight of 12 pounds, and an average length of 36⅛ inches.

△ △ △

Kentucky Reel

For the first time since modern bait-casting began, a generation of fishermen are growing up who may never have a chance to fish an old Kentucky reel—a genuine B. F. Meek. These were the first multiplying reels ever made, and they were responsible for bait-casting as we know it today. For more than 100 years, Meek reels were known and used around the world. Many old-time fishermen still regard them as the greatest reels ever produced.

SHORT STORY

A Better Mousetrap

By John Bulling

I WAS ABOUT to doze off into an after dinner coma, when the ad caught my first fancy display eye. There was nothing about it. In fact, it was in the want ad columns and I only noticed it because it had been set in heavy type. It went somehow like this:

3-Minute Fiction

HERE IT IS AT LAST! ! I BEAT A PATH TO OUR DOOR, FOLKS! 'KILLIT' IS GUARANTEED TO KILL RATS AN MICE. DOUBLE YOUR MONEY BACK IF YOU FAIL TO KILL RODENTS AFTER FOLLOWING THE SIMPLE INSTRUCTIONS!

There followed a name and address, and a request to send one dollar for a genuine 'Killit'. The thing was guaranteed. What could I lose?

I took the paper to the kitchen and showed the ad to Mary. She insisted that we didn't have any mice or rats, but I said maybe not, but it would be nice to have a guaranteed mousetrap anyhow. I wadded up a dollar bill and stuck it in an envelope and addressed it to the Killit people and made a special trip to the post office to mail it.

I showed the ad to Mary, but she insisted that we didn't have any mice or rats.

Later I got to thinking about it. I hoped that Killit would not be a cat—we already had one cat, and there just isn't room for another one in our two by four apartment. But then, they couldn't send you a cat by mail, could they?

I thought of a buddy of mine, Bill Stout. He was a chronic smoker—you know the type. The world is his ashtray. He had already started several expensive fires by laying down cigarettes and forgetting where he'd put them. He had seen an ad in the paper for an ashtray guaranteed to snuff forgotten cigarettes. Just the thing for him. He'd ordered the thing, and when it came in the mail he had found out why it had been guaranteed—it had to be filled with water. How we'd all laughed at Bill for being caught by slick advertising.

BUT how could a mousetrap be guaranteed to kill if it didn't do just that? No, I was safe enough from the hilarity of our crowd. If I bought a lemon and the story happened to leak out, I should never hear the end of it, particularly from Bill. I remember how mad he'd been when I laughed at him. But a mousetrap guaranteed to kill—there was no way of getting around it.

I tried to figure out what the thing would be like. Basically a mousetrap doesn't appear capable of much change. I mean to say, the thing we all know as a mousetrap is sound, and seems about the only way to go about catching mice short of running after them.

That same Sunday night I had dreams about mousetraps. I'm one of those guys who can always remember his dreams with crystal clarity. The mousetraps I had entertained in my subconscious during the night, while they had seemed pretty good at the time, were complete washouts in the harsh light of day. Most of them were Rube Goldberg affairs, and none of them would have worked.

I began to forget the beastly mousetrap though Mary didn't. Apparently a workable idea had come to her while she was down at the market, and she had held up the line at the cashier's counter by demanding a piece of paper and a pencil—neither of which she ever has with her—and sketching out a fairly detailed plan of the thing, deaf to the selfish barracking of the pushing assortment of waiting housewives. She brought it home, indignant at the attitude of the shopping public, and showed it to me. I said it would have been the best mousetrap to hit civilization yet, and where are you going to get the cyclatron to work it?

We weren't kept in suspense too much longer. A package came in on the mail on the Wednesday or Thursday of the same week. It was very heavy, and had cost twenty-four cents to mail. We ripped it open and out came a flat slab of wood about six inches square and a piece of lead pipe a foot long. And a sheet of printed instructions which started out: Place the mouse or rat to be killed on the wooden block and strike it smartly behind the ears with the pipe. . . .

Be Prepared

"Why?" is the question that drives most parents to distraction—but, according to child guidance experts of Childcraft books, you can be prepared for what's to come. Results from a survey of children's interests indicate the leading interests of children from kindergarten to sixth grade are topics of nature such as animals, plants, weather and the sky.

Gold-Coat

Faced with the problem of finding a high lustre finish with good adhesion to replace unavailable brass plating on zinc alloy and aluminum die cast parts, manufacturers are utilizing gold-colored finishes which closely resemble plated metal. These coatings have excellent adhesion qualities and are scratch-resistant.

Window Derattler

Automobile window rattles and vibrations can be eliminated, according to Rolexco, Inc., Orange, N. J., with one of the company's new one-piece rubber repair units. The anti-rattle device slips between the inside buffer strip and the window glass.

Building Reverend

The Rev. Albert A. Stier, of Clifton, N.J., is a building contractor. He is responsible for several housing projects, among them one known as Styertowne.

The Right of Way

In England the fox, the hounds and hunters have the right of way over trains during the hunting season. A few seasons past the engineer of a fast London train fumed and fretted for eight minutes, watching his schedule go to pieces, while the Belvior hunt—fox, hounds and horses—crossed the track. However, this "right" is seldom exercised.

Dead Level Track

The world's longest stretch of straight track on a dead level is on the Ferrocarril National General San Martin Railway of Argentina. This stretch of track extends 205 miles between Junin and Mackenna without the slightest curvature to right or left and with the elevation remaining constant.

Promise Kept

Before General MacArthur's triumphant invasion of the Philippines, 4,500,000 book matches with his promise—"I Shall Return"—were dropped from planes. The few copies of these which exist today are valuable collector items.

Keeps Out Cool Breezes

For weather stripping a door or window with metal casements, felt can be held in place with thick shellac. For best protection, make sure there are no air leaks around windows or doors.

Americana

Even the great American writer, Nathaniel Hawthorne, failed to burn up the world with his first literary efforts. The Book House for Children relates that he realized so little money from early magazine articles, he was forced to take a job as a weigher in the customs house at Boston and later to work as a farm hand.

Don't Starve Grass

Where there are trees on lawns, Scotts Lawn Research experts have noted that the grass is starved through theft of nourishment by near-surface roots. This can be avoided, the experts say, if double rates of fertilizer are applied in areas under trees out as far as the tips of the longest branches.

Steubenville, Ohio

Fort Steuben was built in 1786 on the Ohio River about 40 miles below Pittsburgh, and was named after Baron von Steuben, "drillmaster" of the Continental Army. The town of Steubenville was planned about 1797 at the site of the Fort. Iron-making furnaces were built in the town about 1852. Today, Steubenville has capacity for nearly 1.5 million tons of iron, and about the same steel capacity.

Past Perfect

It was the custom in Ancient Egypt for the ladies to present flowers to the men. The Book House for Children describes how the young king, Akhnaton, received floral tributes from his beautiful wife, Queen Nefertiti, as an expression of her undying affection for him.

Motorized Nuns

Motor scooters and bicycles are used by Roman Catholic nuns in their work of caring for the sick on the French countryside.

Fuel Waste

An air-pollution expert estimates that industry wastes some 800 million dollars worth of fuel annually as a result of inefficient burning.

No Work of Art

A book published in 1927 achieved wide circulation; it was called Mein Kampf.

Officials of the hosiery exposition have awarded a "hosiery Oscar" to Ginger Rogers, possessor of what they described as "the most beautiful legs in America."

FIRST AID TO THE AILING HOUSE

BY ROGER C. WHITMAN

Painting Over Shingle Stain

QUESTION: The upper half of our house is brown stained shingles. We want to paint them white. How can we do it? Is there any way we can prevent the stain from "bleeding thru?"

ANSWER: If the stain is very old and weathered it may be safe to apply a first coat of aluminum paint and then put on the house paint. But if the stain is fairly recent, it would be well to apply a stain-seal to prevent any possible bleeding through. Consult your paint dealer, and buy top quality products.

P.S. Mend broken dolls, wood toys with amazing PLASTIC WOOD

TO KILL Chicken Lice AND Mites

Apply Black Leaf 40 to roosts with handy Cap Brush. Fumes rise, killing lice and feather mites, while chickens perch. One ounce treats 60 feet of roosts —90 chickens. Directions on package. Ask for Black Leaf 40, the dependable insecticide of many uses.

Housework Easy Without Nagging Backache

When kidney function slows down, many folks complain of nagging backache, loss of pep and energy, headaches and dizziness. Don't suffer longer with these discomforts if reduced kidney function is getting you down—due to such common causes as stress and strain, over-exertion or exposure to cold. Minor bladder irritations due to cold, dampness or wrong diet may cause getting up nights or frequent passages.

Don't neglect your kidneys if these conditions bother you. Try Doan's Pills—a mild diuretic. Used successfully by millions for over 60 years. While often otherwise caused, it's amazing how many times Doan's give happy relief from these discomforts—help the 15 miles of kidney tubes and filters flush out waste. Get Doan's Pills today!

DOAN'S PILLS
It's Wonderful the Way
Chewing-Gum Laxative
Acts Chiefly to
REMOVE WASTE —NOT GOOD FOOD

Here's the secret millions of folks have discovered about FEEN-A-MINT, the modern chewing-gum laxative. Yes, here is why FEEN-A-MINT's action is so wonderfully different!

Doctors say that many other laxatives start their "flushing" action too soon . . . right in the stomach where food is being digested. Large doses of such laxatives upset digestion, flush away nourishing food you need for health and energy. You feel weak, worn out.

But gentle FEEN-A-MINT, taken as recommended, works chiefly in the lower bowel where it removes only waste, not good food! You avoid that typical weak, tired, worn-out feeling. Use FEEN-A-MINT and feel your "peppy," energetic self! Get FEEN-A-MINT! No increase in price—still 25¢, 50¢ or only 1¢.

Pageant to Aid Scholarship Fund

Featuring a pure-bred Arabian stallion, the pageant "An Arabian Fantasy," based on the story of Aladdin and His Wonderful lamp, will be presented by Kellogg's Arabian Troop at 8 p. m. Saturday, October 6, at the Organ Pavillion, Balboa Park, for the benefit of the Mary Nicolls Scholarship Fund of the San Diego Chapter of the American Association for the United Nations.

Done in colorful, musical pagentry, in pantomine and dance, the production has a cast of 30. The Arabian horse, Allatafa, will appear in a dramatic moment of the play when Aladin rubs his magic lamp. The story deals mainly with man's struggle for enlightenment and wisdom during a dark age.

Mrs. John O. Kellogg, who wrote the story based on Sir Richard Burton's translation of the "Thousand Nights and a Night," is also director of the allegorical fantasy. She is also providing the three-year-old, copper-colored Arabian horse from her own stables.

All proceeds from the performance will be turned over to the scholarship fund of the local chapter of the AAUN. The fund was established four years ago by Miss Mary Nicolls, retired City Schools teacher who died in July of this year, and who was scholarship chairman from the fund's inception. It was recently renamed the Mary Nicolls Scholarship Fund in her memory.

Purpose of the fund is to interest young Americans in international relations and the Unied Nations. In addition, plans are being made to help foreign students to do some work connected with the United Nations by financing study here in the United States.

To date, the local AAUN Scholarship Fund has financed participation for local high school and college students in collegiate conferences on the United Nations, and observation trips to actual United Nations sessions in New York. Last April the fund sent eight students from city and county high schools and from State College to Stanford University where a model United Nations was presided over by Dr. Ralph Bunche, famed UN mediator.

Tickets for "An Arabian Fantasy" will be available at the box office at the Southern California Music Company, 630 C Street, from September 29 through October 6. Tickets will also be available at the Organ Pavilion the night of the performance. Children under 12 will be admitted free when accompanied by a holder of a ticket.

Chief Satorus Goes to Great Lakes

Lieut. Com. Clarence F. Gould, U. S. N., and Mrs. Gould and two little daughters, of Albuquerque, N. Mex., have leased the home of Arthur E. Satorus, 7855 Sanford. Com. Gould has been transferred to the 11th Naval District, San Diego.

Chief Sartorus, MMC, U. S. N., has been transferred to Great Lakes Naval Station, Ill., and with Mrs. Sartorus and children, Arthur Jr., Sylvia and Charles left Tuesday for their new home. Mr. Sartorus will be an instructor there for two years.

Arthur J. was a sophomore in Helix High School. He was the catcher for the Jack Hanna baseball team which won the County American Legion baseball championship. Arthur is a good athlete, shows fine sportsmanship and should have a good future in baseball. He says he'll be back in two years to join the team.

Otto Osthimer is Given Silver Star

Otto Jay Osthimer, 7505 Pacific Avenue, has received a Silver Star Medal from the Army awarded posthumously to his son, Private First Class George H. Holbrook, who was killed in Korea last September.

The citation states in part: "Near Yongsan, Korea, Private Holbrook's platoon was attacked by a numerically superior enemy. During this attack the platoon was forced to withdraw to better positions, leaving some of the wounded behind. Private Holbrook, with utter disregard for his personal safety, crawled back through intense enemy fire and rendered first aid to three wounded men. He then returned to his company for further supplies. During this action he was wounded but continued his search for other wounded until he was killed by hostile fire. For this heroic action he was awarded the Silver Star for gallantry in action."

While in Korea, Private Holbrook served with the 9th Infantry Regiment of the Second Infantry Division.

Hi-Y Groups to Camp at Julian

George B. Corwin, YMCA National Youth Secretary, will assist at the San Diego City and County Hi-Y and Tri Hi-Y Training Camp at YMCA Camp Marston, near Julian, Saturday and Sunday, according to Bill Poirier, County YMCA secretary.

Delegates from 30 County area high school Y clubs will enjoy the outdoor and training activities beginning at 1:00 p. m. Saturday.

Mr. Corwin of New York, who assists over 10,000 such clubs will guide the club delegates in developing service projects in keeping with Hi-Y standards. Training in officer duties, programs and inter-club events will be included.

Mary Ann Small, Alpine Tri Hi-Y President, who attended the 6th Hi-Y Tri Hi-Y Congress last June in Cleveland, with other Alpine members, will lead in the conference opening. Registrations are due Thursday and a total of over 100 are expected. Many boys are expected from Lemon Grove area.

Boating, swimming and other outdoor sports will be part of the recreation.

Elks to Honor Newspaper Men

The El Cajon Order of Elks will take part in the observance of National Newspaper Week. Exalted Ruler A. M. Paris announced that a banquet will honor El Cajon, Lakeside, Lemon Grove, La Mesa, and Metropolitan San Diego newspaper men Monday evening, in the El Cajon Elks Club.

"Elkdom appreciates the great contribution that our newspapers make in giving us the truth so that we in turn can discharge our responsibilities as free citizens," said Paris.

Roy F. Ashe, Convair engineer and Secretary-Treasurer of San Diego Toastmasters, will express Elkdom's gratitude to the importance of the press in defending and promotion individual right and freedom following the banquet at 6:30 p. m.

The slogan for this year's observance of Newspaper Week is, "Your newspaper lights the way of freedom."

NEW STORE MANAGER

Mrs. Luveda Cutbirth, of El Cajon, is the new manager of Evelyn Wigton's, 7763 Broadway. Mrs. Cutbirth was formerly with the El Cajon store for four years. She will be happy to have ladies of the community come in and get acquainted.

Local Men Get Commendations

Eighty-two civilian employees of the Naval Supply Depot, San Diego, including supervisors and shop foremen recently received special Navy commendation for their accident prevention records during the past year.

The commendations, together with individual safety award pins, were presented by Commander J. T. Mathews, Jr., executive officer of the Supply Depot. Among those listed were S. E. Bullock, Golden Ave.; H. F. Estes, 8450 Adams; Herbert L. White, 8344 Imperial; and Earl Sutton, 4021 Paula.
